STRATEGIC NOTE OUTCOME PROGRESS NOTE

SHOWING DATA OF : 2023

China's international financing, investments and business engagements, including through connectivity initiatives, programmes and projects, contribute to SDG attainment in partner countries

During 2023, some progress was made toward government bodies, research institutions and private sector entities in China having increased knowledge and capacity in gender-sensitive financing, and the ability to advance gender equality through gender responsive financing tools, guidance and practices. UN Women nurtured important relationships with research institutes, private sector entities, government partners, and sister UN agencies. Together with these partners, we implemented high-level dialogues; conducted foundational research; developed training tools; and launched new joint initiatives aimed at increasing knowledge and understanding of gender-sensitive financing and effective gender responsive financing tools among key stakeholders. UN Women forged strategic partnerships with think tanks and research institutions, including the Center for China and Globalization (CCG), with which we convened high-level multi-stakeholder dialogues on financing for gender equality, creating platforms for exploring issues including gender-smart investment and business practices) and promoting financing for gender equality in innovation, technology, and digital education (2023 DigitALL - Symposium on Gender-Responsive Technology and Innovation in the 21st Century). UN Women and CCG co-hosted a dialogue "Promoting Gender-Smart Business Practices & Investment" on September 6 th as part of the 2023 Global Talent Sustainable Development Forum at the China International Fair for Trade in Services (CIFTIS). The event encouraged participants, including from the public and private sector, to share best practices, success stories, and strategies for promoting responsible and gender-smart

business and investment practices in order to accelerate progress toward SDG 5. UN Women, together with the International Institute for Green Finance (IIGF), developed a landscape analysis, mapping existing sustainable financing initiatives through desk research and stakeholder interviews, analyzing opportunities and challenges for promoting gender financing in China, and identifying key stakeholders for engagement in high-potential areas. The landscape analysis is informing UN Women China office's future programming direction in the sustainable financing and has informed the design of a technical workshop for participants from government, IFIs, MDBs, academic institutions, and CSOs that will delve into different modalities for gender financing and raise awareness of best practices among key actors, as well as a series of learning salons and networking sessions aimed at building a network of diverse stakeholders working on gender financing and facilitating meaningful collaboration among these actors. A policy brief will be developed based on the landscape analysis and subsequent learning events. UN Women, together with UNDP, UNICEF, and ILO have come together to advocate for the UN and international standards and business practices on Responsible Business Conduct to be adopted and implemented by Chinese enterprises operating overseas to contribute towards achievement of the SDGs. Entities jointly developed a "Scoping Report: Collaboration on Promoting Responsible Business Conduct of Chinese Overseas Investment for the Contributions to the SDGs" and an accompanying practical Responsible Business Practices Handbook for Chinese companies, which will be piloted through learning sessions in the coming year. In support of China's evolving role as an international development cooperation (IDC) actor and to promote demand-driven and gender-responsive IDC projects, a joint programme led by UNDP with UN Women, FAO, and WHO, in partnership with the EU has been developed – "Effective Multilateralism in China towards advancing the Sustainable Development Goals." UN Women is the lead partner for delivering on GEWE aspects of the joint programme, which will be formalized into agreement in early 2024 and come into effect the same year. Under the programme, UN Women will deliver tools and training to strengthen Chinese government, private sector, and financial sector capacities for SDG 5-aligned orientation.
