STRATEGIC NOTE OUTCOME PROGRESS NOTE

SHOWING DATA OF : **2022**

By 2025, women and girls have greater access to socio-economic and technological opportunities for their empowerment, and to services for the prevention and management of all forms of violence, particularly harmful practices (UNSDCF Outcome 6)

In 2022, 578 women and girls had increased access to socio-economic and technological opportunities for their empowerment and to services to prevent and manage all forms of violence with the support of UN Women. In detail, 236 adolescent girls and young people (aged 15 to 24), victims of sexual exploitation, had access to HIV, STI and GBV prevention and care services in the health districts of Yopougon-Est, Yamoussoukro and Bongouanou, thanks to a project supported by UN Women and implemented by an NGO (NGO Blety). Forty (40) of these beneficiaries received funding for the establishment of income-generating activities and training in business management and simplified accounting. Fifty (50) women living in the northern border areas of Burkina Faso benefited from information on the support available to women in the mechanisms to combat violent extremism during a joint mission organized by UN Women and UNHCR. One hundred (100) women farmers were connected to markets for goods and services and products, and have easier access to strategic information for better management of their activities.
