STRATEGIC NOTE OUTCOME PROGRESS NOTE

SHOWING DATA OF: **2022**

The national government and local entities strengthen their capacities to accelerate the 2030 Agenda and the SDGs with the support of the UN Women, strengthening the production, analysis and use of gender statistics (UNSDCF 3.1)

In 2022, UN Women Colombia made significant progress on Outcome 3.1 (on track). Thanks to the development and launch of the second edition of Colombia's Gender Profile –known as "Women and men: gender gaps in Colombia" (2022) —; the bases for the new National Development Plan 2022 - 2026 include a specific section for women called "Women, power of change" that incorporates the analysis made in the publication. The publication was developed in partnership with the National Administrative Department of Statistics (DANE) and was launched on November 17 th 2022 by UN Women together with DANE and the Presidential Council for Women's Equality (CPEM). During the event, the National Planning Department (DNP) acknowledged the important contribution of the publication to the new development plan. As part of its strategy to strengthen the production, analysis and use of gender statistics, UN Women informed the participation of women's organizations in the National Binding Dialogues by disseminating with them strategic summaries and presentations on the Gender Profile. This allowed women's organizations to prepare evidence-based proposals and present them in the Dialogues to position their needs and priorities. UN Women also presented "Women and Men: Gender gaps in Colombia" to diverse institutional stakeholders, including the National Planning Department (DNP), national and local entities to present the analysis of progress and lags on gender equality, as well as recommendations to bridge gender gaps through affirmative actions. As part of its efforts to enhance the production, analysis and use of gender statistics at a local level, UN Women developed and socialized 4 Territorial Summaries of the most relevant data and information contained in the second edition of Colombia's Gender Profile for the departments of Chocó, Nariño, Cauca and Bogotá. These were used as a key input for the Regional Binding Dialogues, and informed the participation of local women organizations within them, and the creation of local care systems with a territorial approach in Bogotá. Finally, UN Women continued with its work to support the strengthening of local Gender Observatories through the development of an assistance strategy that responds to the particular need of each of the 5 observatories.
