	2023 (Milestone)	55%	50
	2024 (Target)	60	–

INDICATOR STATEMENT	YEAR	BMTS	REPORTED RESULT
COL_D_3.1C Evidence on use of gender statistics, analysis, and policy relevant research is documented	2021 (Baseline)	Yes	N/A
	2022 (Milestone)	YES	TRUE
	2023 (Milestone)	YES	TRUE
	2024 (Target)	Yes	–

INDICATOR STATEMENT	YEAR	BMTS	REPORTED RESULT
COL_D_3.1D	2021 (Baseline)	1	N/A
Number of policies formulated with UN Women's support based on data and evidence.	2022 (Milestone)	1	2
	2023 (Milestone)	1	2
	2024 (Target)	1	–

INDICATOR STATEMENT	YEAR	BMTS	REPORTED RESULT
SP_D_0.6.2	2021 (Baseline)	3	N/A
Number of national plans and strategies that integrate gender statistics as an objective or strategy (CO, RO, HQ)	2022 (Milestone)	2	2
	2023 (Milestone)	1	2
	2024 (Target)	1	–

- Complementary Indicator :

The national government and local entities strengthen their capacities to accelerate the 2030 Agenda and the SDGs with the support of the UN Women, strengthening the production, analysis and use of gender statistics (UNSDCF 3.1)

In 2023, UN Women Colombia made significant progress on Outcome 3.1 (on track). In alliance with the Geographic Institute Agustín Codazzi (IGAC), UN Women began the process to analyze the results of initiatives to produce recommendations for the mainstreaming of the gender approach in the Multipurpose Cadaster, the Cadaster Public Policy and the Integral Rural Reform through the use of qualitative and quantitative methodologies. The qualitative data was gathered through a series of in-depth interviews with participants of the key cadaster operations, which were facilitated by the German Cooperation Agency (GIZ). The quantitative data was obtained from a pilot developed during 2022 in the department of Boyacá, which was stored in the LADM-COL Model. A verification was carried out on the comprehensiveness and quality of the sex variable, identifying indicators to evaluate the quality of the information from the Multipurpose Cadaster. The results were compared with the applicable standards for the Multipurpose Cadaster, highlighting the strengths and improvement areas of the operations. Currently, UN Women has supported the analysis to provide a detailed view on the characteristics of the persons interested in the properties, segregated by sex and landownership, occupation, or possession. This information is vital for the decision-making process regarding the implementation of the Rural Reform. Through the co-creation of a pedagogic tool, UN Women engaged in capacity-building activities for the enhancement of the knowledge on the gender approach of the public-servers of the IGAC . The learning material includes six units that touch upon cross-cutting issues for the generation and diffusion of the Multipurpose Cadaster, been an articulated effort with the Intercultural Schools for Multipurpose Cadaster and the Regional Encounters with Rural Women developed by the IGAC. The articulation with these instances will allow for the knowledge transfer to national cadaster managers, achieving the understanding of the gender approach is vital to address the challenges that women face regarding their access to ownership and tenure of the land. Finally, UN Women also participated in the Data Festival of the Global Partnership for Sustainable Development Data held in

Punta del Este (Uruguay) to position its work regarding disability-inclusive data. This, by socializing the results of a Rapid Assessment produced during the Inception Phase of the Disability project financed by the UNPRPD.
