Data as of:
27 July 2024

OUTCOME ECA_D_1.1 [XM-DAC-41146-ECA_D_1.1](#)

Duty bearers implement and finance evidence-based gender-responsive normative frameworks and policies, including in the context of crisis response and recovery.

OUTCOME DETAILS

SDG alignment

Impact areas

Governance and participation in public life

Women, peace and security, humanitarian action and disaster risk reduction

Organizational outputs

Norms, laws, policies and institutions

Financing for gender equality

Gender statistics

Outcome Description

GRB and normative work

UN Partners

UNDP

UNFPA

UNICEF

Policy Marker

GENDER EQUALITY

Humanitarian Scope

No

UN System Function

Advocacy, communications and social mobilization

Capacity development and technical assistance

Comprehensive and disaggregated data (discontinued)

Integrated policy advice and thought leadership

	2023 (Milestone)	3	4
	2024 (Milestone)	-	
	2025 (Target)	-	-

STRATEGIC NOTE OUTCOME PROGRESS NOTE

SHOWING DATA OF : **2022**

Duty bearers implement and finance evidence-based gender-responsive normative frameworks and policies, including in the context of crisis response and recovery.

The outcome was not fully achieved, however significant progress has been made in the implementation and financing of gender response normative frameworks and policies. Key legislative enhancements have been made by ECA countries/territories that have further institutionalized and ensured the sustainability of financing and implementation of governmental gender equality legislation and commitments at national and local levels. In the Western Balkans, governments have adopted two new national policies and laws in 2022 that directly regulate gender mainstreaming in the budgetary processes. In North Macedonia, the new Organic Budget Law includes gender budgeting as part of the budget planning process. The Law includes the definition of key terminology, such as the principle of gender equality, gender responsive budgeting, gender responsive budget statement, and gender indicators and an obligation to report on gender responsive indicators and achieved goals and results. In Kosovo, the government adopted a new Concept Document on Gender Responsive Budgeting (GRB) which represents a critical step in the ongoing process of institutionalization of gender responsive budgeting. In Bosnia and Herzegovina, the government initiated a participatory process to develop the next Gender Action Plan for the period beyond 2022, and at the local level, 65 local governments introduced policies and are implementing gender responsive budgeting. UN Women has provided critical technical support to governments in all countries and territories in the process of policy formulation. Four countries (Albania, Armenia, Serbia and Ukraine) from ECA region are among 19% of the countries that have systems in place to track investments in gender equality (according to data on the implementation of SDG 5c1 indicators received from 69 countries). UN Women provided direct technical support to the Governments of Serbia and Albania in achieving this result. North Macedonia and Kosovo significantly improved the gender responsiveness of their legal frameworks related to budget laws and budget preparation and BiH, Belarus, Georgia, Tajikistan and Moldova invested heavily in capacity building of public administration at the national and local level to integrate gender in the budgetary and policy process. In Albania, budgetary allocation for gender equality

increased from 1% in 2015 (38.4 million USD) to 9% in 2023 (480.9 million USD), while Bosnia and Herzegovina reported an average of 4.54% of its annual budgetary allocations (of selected state and entity line ministries) in 2022. Governments of Armenia and Georgia strengthened their national capacity to design and collect gender related indicators on emerging issues such as measuring unpaid domestic and care work as a result of conducting the first-time use survey . This critical data will enable the country to fill in specific data gaps and start monitoring the progress towards achieving the target 5.4 of SDG 5. In Kazakhstan, the Government has been supported to design and collect data on VAW, one of the commitments undertaken within the framework of gender equality action coalition on gender-based violence. UN Women ECARO has provided methodological guidance and financial support to the National Statistical Office of these countries throughout the whole cycle of data collection and analysis, including strengthening the catalytic partnership and south-south cooperation across countries in the region. There are still remaining challenges that need to be addressed to advance further progress, including increasing political will towards enacting meaningful legal frameworks that promote gender equality in decision-making institutions and processes. UN Women ECARO advocated to member states to consider various forms of temporary special measures that have proved effective, including gender quotas for elected and appointed positions, and provided technical support to UNCTs on advancing TSMs and gender responsive legal frameworks. UN Women will continue to provide technical support to policy makers and experts in governments in the region to further strengthen their legislation and enhance capacity, knowledge and skills on how to implement the data and evidence-driven gender responsive policies and interventions Based on the progress made to date, the original strategy and theory of change for this outcome remain applicable . If, as expected the strategy is successful, more gender-responsive normative policies and frameworks will be in place including strengthened capacities to produce timely and high quality gender data in addition to institutionalized gender responsive budgeting across the region.
