STRATEGIC NOTE OUTCOME PROGRESS NOTE

SHOWING DATA OF: **2023**

The UN System demonstrates greater accountability to advance progress on GEWE across the humanitarian-development-peace nexus.

UN Women ECA RO made strong progress towards achieving this outcome on greater accountability in the UN System to advance progress on GEWE. The Regional Collaborative Platform for Europe and Central Asia (RCP-ECA), the Issue-based coalition on Gender Equality (IBC-GE), and the Regional Gender Task Force (RGTF) continue to tackle gender equality during the regular meetings. A few of these platform's results include: The targeted advocacy messages delivered by women parliamentarians, UN Women, UNFPA and UNDP with the national partners led critical thinking on designing and effectively implementation of Special Measures and quotas for women political participation. The II Global Forum of Interparliamentary Cooperation discussed the issues of strengthening interparliamentary cooperation to achieve the SDGs, eliminate discriminations and violence against women politicians. Hosted by Uzbekistan, on November 30 and brings the heads of parliaments from China, Türkiye, Azerbaijan, Kazakhstan, Kyrgyzstan and others. Gender perspective are more present in the regional analysis (2023 MSNA Regional Analysis, 2023 Rapid Gender Analysis, Poland Protection Analysis), podcast series, joint statement as a result of UN Women's joint work and partnership within the Regional Gender Task Force (RGTF) and regular engagement in Regional Information Management Working Group Meetings, Humanity Hub, CARE and the Ukraine GiHA Working Group, Moldova Gender Task Force under the Refugee Coordination Forum, Regional GBV Working Group, and the Regional Anti-Trafficking Task Force. National Authorities from Poland and Slovakia demonstrating an initial and good commitment to addressing gender issues throughout the humanitarian response. Localized Gender in Humanitarian Action Accountability Frameworks (GAF [1]), identify that the Polish and Slovak response are between a range of fully met 14%- 22 % and partially met of 50% of the GAF criteria. The results of the identified compliances will inform 2024 Refugee Response Planning efforts, as well as feed into global monitoring efforts the collaboration between UN Women and UNHCR in 2023 in both countries has led to the identification of areas of improvement and some of the recommendations regarding gender mainstreaming in the refugee response have already been taken into account in the 2024 RRP processes. Eighty percent (80%) of UNCTs in ECA regions

meet/exceed the minimum requirements of the United Nations Country Team System-wide Action Plan (UNCT-SWAP) Gender Equality scorecard performance indicators for the last two years (2022-2023), compared to 55 per cent in 2019.. According to a global revision of the UNCT reports the number of UNCTs that meet/exceed the financial targets for allocations to GEWE doubled in the last 3 years. All UNCTs from ECA region are applying Gender Equality Markers (GEM) to UN joint work plans at country levels to track GEWE allocations, and more carried capacity building events on how to integrate and track financing. UN Women ECA RO supported training sessions for UNCTs representatives (total 80 person -70 women and 10 men) from Albania, Moldova, Tajikistan, and Uzbekistan which bring the UNCT performances from “approaching minimum requirements” to “meets minimum requirements” of the UNCT SWAP performance indicator (6.1). UN system colleagues, Resident Coordinators, and UNCTs in the ECA region have access to advise on how to respond to the growing movement opposing gender equality and human rights principles through the guidance provided in “Key Messages on Gender Equality Pushbacks for the UN System in ECA Region .” The regional Issue-based Coalition, co-chaired by UN Women and UNFPA, engaged in a comprehensive preparation process to craft this document. RCs, RCOs, Gender Theme Groups and leading academics, practitioners and activists met to discuss, raise awareness and identify joint advocacy measures needed to tackle increased gender equality pushbacks across the region. ECA RO maintain the same TOC with some adjustments at outcome levels, following the mid-term revision of the ongoing strategic note, as part of the bi-annual work planning process for the 2024. This will allow to ensure greater focus on increasing UN Women’s role as a members of regional coordination mechanisms and on increasing inter-agency mechanism capacities to integrate GEWE perspectives. [1] The global GAF tool was adapted to the Polish and Slovak contexts and includes a total of 28 criteria.
