Outcome Description

The focus is on technical support to the National Statistics Office (CAPMAS) and NCW in collaboration with Paris21 to develop a National Strategy for the Development of Gender Statistics (NSDGS), based on the Assessment Framework and its implementation guidelines that was developed by PARIS21 with UN Women's Women Count programme. Furthermore, ECO will extend technical support to CAPMAS to integrate gender statistics in the different design phases of the National Strategy on the Development of Statistics (NSDS). Furthermore, data user-producer dialogues will be convened to improve the production and dissemination of gender data particularly administrative data that is currently underutilized. This output will be implemented in partnership with CAPMAS, NCW, Economic Research Forum and civil society organizations.

Gender statistics are available, accessible, and analyzed to inform policy making, advocacy and accountability for delivering gender equality and women's empowerment

Final clearance was received by the Government for the UN Women/Paris 21/Government of Egypt-supported review of gender statistics. Based on 54 gender-specific indicators, the review examines the extent to which gender data are available for both SDG and NSEEW indicators. It shows that 51% of the gender-specific SDG indicators are available through existing data sources, with household surveys and censuses being the main data sources. Furthermore, only two-thirds of the available indicators are disaggregated by sex and other characteristics. This review also advises the national statistical body (CAPMAS) on how to ensure their National Statistical Strategy systemtises the generation of gender statistics. This review is also informing OECD's new Gender and Statistics project with the Government of Egypt, which is supporting the government's improved with OECD's statistical requirements, and UN Women is working closely with the OECD team in Paris on this.
