OUTCOME FIJ_D_2.1 [XM-DAC-41146-FIJ_D_2.1](#)

By 2027, more people, especially those at risk of being left behind, contribute to and benefit from sustainable, resilient, diversified, inclusive and human-centred socio-economic systems with decent work and equal livelihoods opportunities, reducing inequalities and ensuring shared prosperity [PCF Strategic Priority 3: Prosperity]

OUTCOME DETAILS

SDG alignment

Impact areas

Women's economic empowerment

Organizational outputs

Access to services, goods and resources

Women's voice, leadership and agency

Policy Marker

GENDER EQUALITY

Humanitarian Scope

Outcome Description

[Former Outcome 2.1] Women in the Pacific, including those from identified LNOB groups, are equally leading, participating, and benefitting from gender-responsive economic services, systems, and governance. [Former Outcome 2.2] Institutions, legal frameworks, policies and measures (mechanisms, processes and services) for advancing women's economic empowerment at national and local levels are reformed/adopted and implemented.

STRATEGIC NOTE OUTCOME PROGRESS NOTE

SHOWING DATA OF : 2023

By 2027, more people, especially those at risk of being left behind, contribute to and benefit from sustainable, resilient, diversified, inclusive and human-centred socio-economic systems with decent work and equal livelihoods opportunities, reducing inequalities and ensuring shared prosperity [PCF Strategic Priority 3: Prosperity]

This outcome is on track. In 2023, efforts to enhance sustainability and resilience in marketplaces in Fiji became paramount, especially amidst diverse risks and challenges. Spearheaded by the Ministry of Local Government (MOLG) and thirteen Municipal Councils, initiatives within market operations and management showcase a dedicated drive towards compliance, diversification, and inclusivity. This concerted effort has cultivated more equitable marketplaces, offering enhanced economic opportunities for women. In addition, collaborative partnerships led by Market Vendors Associations (MVAs) underscore a steadfast commitment to advancing decent work and equal livelihood opportunities across the market and agricultural sectors, while nurturing social cohesion within vendor communities. Rooted in a human-centered approach, these endeavors champion fairness, inclusivity, and empowerment for all stakeholders, laying a sturdy groundwork for the resilience and sustainability of marketplaces in Fiji. The collaboration between the Ministry of Local Government (MOLG) and UN Women is shaping the policy environment of marketplaces in Fiji to be more gender inclusive. The review of market bylaws, with a gender and inclusivity lens, is leading to the creation of gender-responsive and disability-friendly marketplaces in Fiji. By prioritizing health, safety, and universal access standards, this approach considers the diverse needs of market vendors and the marketing public. Gender-responsive actions implemented in market administration and operations ensure that the rights and needs of all individuals, including those with disabilities, are considered and respected. The incorporation of features such as ramps, additional restrooms for women, and changing rooms for mothers and babies promotes inclusivity and equal participation. The upkeep of Women's Accommodation Centres for rural women vendors continues to enable them to remain fully engaged in market activities, contributing to the economic development of rural communities, thus promoting broader socio-economic inclusion. Municipal Councils have also emphasized compliance with national building codes across markets in 2023, ensuring sustainable infrastructure capable of withstanding adverse conditions and ensuring the continuity of economic activities. There has also been enforcement of public health and environmental regulations, which exemplify a human-centered approach by prioritizing the well-being and safety of both vendors and customers and enhancing the resilience of markets against potential health crises and environmental hazards. MVAs have seen notable growth in their collective influence in 2023, progressively honing their leadership capabilities. They championed transparency, and accountability, and advocated for regulatory reforms while prioritizing the economic prosperity, well-being, and rights of vendors. Tailored initiatives, such as cervical cancer screenings and specialized training programs, address

specific needs and empower women and marginalized groups. By providing access to essential healthcare services and skill-building opportunities, MVAs empower women to take control of their health and economic well-being, thereby enhancing their income security and economic autonomy. MVAs also lead on collaborative events which celebrate diversity, fostering social bonds and cohesion among vendors, thus contributing to more harmonious and vibrant marketplaces. Furthermore, market vendors are demonstrating the tangible benefits of capacity building, particularly in financial management and disaster preparedness, enabling them to take control over the decisions and actions that influence the outcomes of their businesses. Moreover, the promotion of cooperative models, diversification, and value chains amongst the vendor community is fostering collaboration and sustainability within the agricultural and market sectors, ultimately contributing to the economic empowerment and long-term success of women in these fields. Approximately 1,805 women market vendors across 13 markets in Fiji were reached to access information, education, key resources (finances, technological tools), services (including social assistance and insurance), and protective goods to advance their economic potential and adaptiveness in crisis. These initiatives ensure equal access to resources and opportunities, contributing to the diversification of income streams and market offerings. In summary, these initiatives have created an enabling environment for decent work and equal livelihood opportunities, fostering sustainable change within the market and agricultural sectors. Finally, the visit of four high-level international delegations from Australia, Canada, and New Zealand to Fiji markets in 2023 provided a unique opportunity to bridge the gap between informal small-market entrepreneurs and global stakeholders. These delegations, comprising government officials, policymakers, and international organizations, witnessed firsthand the entrepreneurship, innovation, and resilience displayed by vendors in their daily operations. These visits have elevated visibility and created opportunities for insights, expertise, and resources to support the development of these entrepreneurs, empowering them to seize opportunities for growth and support Municipal Councils in garnering national and international support for initiatives aimed at enhancing market infrastructure, promoting market access for marginalized groups, and improving market governance.
