Policy Marker

GENDER EQUALITY

Humanitarian Scope

Yes

Outcome Description

The Fiji MCO will leverage its role as chair of the Pacific Humanitarian Protection Cluster and bring together UN agencies and regional and international humanitarian organisations to identify and fulfil the needs of affected communities. The Cluster aims to integrate gender and protection concerns into humanitarian response. Through this outcome work will continue to build capacity and work with regional and national humanitarian actors in five priority countries (Fiji, Samoa, Solomon Islands, Tonga and Vanuatu) to develop tailored gender and protection-sensitive tools and processes, including those for the collection and use of data that is disaggregated by sex, age, disability, sexual orientation and gender identification. The Fiji MCO will further work with the UNCT to leverage the Women, Peace and Humanitarian Fund (WPHF) allocation to the Pacific to support local stakeholders' capacity.

STRATEGIC NOTE OUTCOME PROGRESS NOTE

SHOWING DATA OF : **2022**

Humanitarian planning, response frameworks and programming are gender and protection inclusive and responsive (modified FPI LEAP Outcome 1)

Progress has been made in developing inclusive, protection and gender-responsive frameworks and programming for improving humanitarian planning and response for Pacific humanitarian actors. Capacity building initiatives have led humanitarian and response actors to better understand which groups are discriminated against the most, which are at risk, and where they are located. Perceptions have begun to shift slowly about meaningful inclusion and non-discrimination. This has enabled actors to develop robust frameworks and programming to better tailor their emergency support to the most vulnerable. In addition, the Pacific Humanitarian Team have also increased the integration of gender and protection in humanitarian planning and response frameworks and programmes. Dedicated support to the Tonga Safety and Protection (S&P) Cluster has increased its capacity to respond to protection needs in a more coordinated way in the wake of the Tonga volcano crisis. Through UN Women's technical analysis and inputs in these areas, humanitarian planning and response frameworks are ensuring policy language that addresses violence and keeping people safe from harm, addresses discrimination and understanding of people's different needs, risk, and capacities, and actively addresses exclusion to as to meaningfully ensure the engagement of excluded people. UN Women provided capacity building and technical support to the above initiatives.
