	2023 (Target)	-	0

## STRATEGIC NOTE OUTCOME PROGRESS NOTE

SHOWING DATA OF : **2023**

### **Haïtian women, with a special focus on victims of violence, have increased access to justice services**

This product was implemented and reported in 2022 since a specific project was being implemented to support women organisations and CNAL (the umbrella for the legal assistance bureau "BAL") to offer good quality services to violence survivors. The same organisations have continued to offer the services (legal assistance) while other organisations engaged in women protection with temporary safe spaces have expanded them to shelters and other services, reinforcing the local network of services providers and referring survivors to the justice structures, paying lawyers to accompany them where needed. The impunity level is still high in the country, the prisons conditions are extremely poor. The committee on the correctional Gender Directorate has continued to reinforce itself after the project with UN Women was closed (EU funds). Indeed, UN Women continued to offer its services to this committee helping the members to elaborate their new action plan after having evaluate the old 2-year action plan. Moreover, the Police force and INFP were able to finalize a protocole that needs to be signed by their respective general director regarding women's continued education (with a certified program by INFP) while in detention.
