STRATEGIC NOTE OUTCOME PROGRESS NOTE SHOWING DATA OF : 2022

Institutions and people contribute more effectively to advance a higher value-added and inclusive economic transformation

Increasing number of private sector companies join forces as WEPs signatories with total of 177 companies (33 companies are qualified to join as WEPs signatories in 2022) and contribute more to the inclusive economic transformation through commitment to the promotion and implementation of WEPs in the world of work. More women entrepreneurs better run businesses as they apply increased entrepreneurship skills with gender perspective and strengthen their value added and market competitiveness. At the same time, they contribute to the economic empowerment of women and promoting their agency within the community through e.g., increased employment, stable income earning opportunity, improved welfare and decision making process in the household. UN Women contributes to the outcome by advancing enabling business environment through knowledge generation, capacity development, advocacy and awareness raising, often in partnership with multiple stakeholders which include public and private sectors, women network and CSOs on promoting women's economic empowerment through WeEmpower Asia and Together Digital projects. The collaboration has resulted in i) A total of 505 women entrepreneurs have enhanced/strengthened entrepreneurial and digital skills with gender perspective through workshop organized in collaboration with MoWECP, ii) Another 244 male partners raised awareness through gender equality training held by UN Women, and iii) MoWECP and UN Women developed three guidelines each as part of the national dialogue process on GEWE with inputs from diversity of stakeholders. The three guidelines include 1) Guideline for Gender Responsive Business, 2) Guideline on the Prevention of Harassment or Violence in the Workplace based on ILO Convention 190, and 3) Guideline on Gender Reporting, adopting the Principles of Women's Empowerment and the WEP Transparency and Accountability Framework. As finalized and launched in 2022, relevant stakeholders have access to these new tools that will guide enterprises and other businesses with actionable initiatives to advance GEWE in Indonesia. For the capacity building initiatives, UN Women's role is to provide the training materials and trainers while key partners such as Ministry of Women's Empowerment and Child Protection (MoWECP) coordinated with the local government to support this activity and to reach out the women entrepreneurs as beneficiaries. As for capacity building collaboration with the

Government Investment Agency (PIP), UN Women has provided the training materials and has monitored the activity while the Government Investment Agency funded the Training of Trainer activities directly to the consultant. In capacity building collaboration with the British Council, UN Women has provided the gender training material that has been adapted by the British Council for the training and supported the TOE (training for women entrepreneurs), while the British Council supported the Training of Trainers. For the development of guidelines, the three guidelines that were initiated by UN Women, the role of partners such as i) ILO as the partner that co-developed the guideline, ii) the MoWECP as the expert partner, provided consultations and inputs on the guidelines. UN Women's strategy by engaging MoWECP during guidelines development was to make MoWECP become the owner of the three guidelines to be implemented (after UN Women handed over the guidelines), in which MoWECP agreed to do so. The guidelines were launched together with MoWECP in June 2022.
