Country-Level Data for Kyrgyzstan country Outcome XM-DAC-41146-KGZ_D_3.1

OUTCOME KGZ_D_3.1   XM-DAC-41146-KGZ_D_3.1

Women and men, especially youth, value social norms supporting gender equality and women's empowerment at individual and community levels

OUTCOME DETAILS

SDG alignment

Impact areas

Women's economic empowerment

Ending violence against women

Women, peace and security, humanitarian action and disaster risk reduction

Organizational outputs

Norms, laws, policies and institutions

Positive social norms

Outcome Description

In order to contribute to the above the CO will equip youth, women and men with skills and tools to transform gender relations within families and communities and to effectively promote gender equality and prepare social activists and opinion makers. This interacts with the second Outcome in that our work in Outcome I builds advocacy platforms to lobby for GEWE with policy makers in legislature and government, while holding the judiciary accountable.

Number of gender responsive plans or policies on COVID-19 informed and supported through gender data, analysis and policy dialogues	2020 (Baseline)	0	N/A
	2021 (Milestone)	1	6
	2022 (Target)	–	–

STRATEGIC NOTE OUTCOME PROGRESS NOTE

Women and men, especially youth, value social norms supporting gender equality and women's empowerment at individual and community levels

During the reporting period, progress towards this outcome was significant compared to baseline data, which revealed deeply rooted discriminatory practices, attitudes, and gender stereotypes in target communities (ethnographic review in 2020). According to monitoring findings: After GALS, communities started to openly discuss the issues of violence, where before it was largely silenced as a strictly family matter. Families have begun to reflect on a possible reassessment of family values, a renewed sense of love for art, sports, and getting used to starting the day with positivity, saying polite and loving words to each other. 70% of the oblast champions have revised their attitudes towards the role of women and men in the family, with greater support for equal sharing of responsibilities and consideration of everyone's role. Families started to think about the need for a fair approach to child-rearing, regardless of the gender of the child, as well as rejecting ideas about division of work into male and female work. 30% of men are involved in education and upbringing process. Fathers started to take time for their children and not only for education, but also for their childcare (understanding their role in children's upbringing and that this is not only the duty of a mother to care for their children); 40% of fathers have improved communication with their families. They started to discuss family matters together, to value everyone's contribution, to be open to dialogue, and to openly discuss what matters to other family members. This improved a number of relationships (relationships: husband-wife, parents-children, father-daughter, mother-in-law-kin, among friends, among colleagues, and among neighbours). The needs of each family member are recognized and their interests are taken into account in the decision-making process. Champions have started to take more account of children's interests and needs, to prioritize children's development costs (both for male and female children)). Champions have started to discuss the need to plan and distribute family budget and have started their own family business; Champions recognise that women can earn as much as men and can choose their professional activity. UN Women made significant contributions to these results by upscaling and replicating the Gender Action Learning (GALS) methodology, which was successfully tested through previous UN Women work on changing social norms and behavior. The work on GALS was done by the IP Education for Community Development (ECD). Success story and quotes as evidence of the transformation Changing social norms to end violence against women and girls in Kyrgyzstan (Success story was
