STRATEGIC NOTE OUTCOME PROGRESS NOTE

SHOWING DATA OF : **2023**

By 2027, more people, particularly those at risk of being left behind, benefit from more equitable access to resilient, and gender-responsive, quality basic services, food security/nutrition and social protection systems. [PCF Strategic Priority 2: People]

This Outcome is On Track. In Kiribati, efforts to change social norms have played a crucial role in addressing gender-based violence (GBV), highlighting the importance of collaboration among government, communities, and various stakeholders in culture, faith, and sports. This focus on social norms change initiatives has led to significant improvements in the support and protection of women and girls. The process of updating the Eliminating Sexual and Gender-Based Violence (ESGBV) Policy, led by the Ministry of Women, Youth, Sport, and Social Affairs (MWYSSA) with support from UN Women, has been instrumental in this shift. By aligning the policy with international standards and integrating gender equality across all thematic areas, Kiribati has demonstrated a strengthened commitment to combating GBV. This policy revision emphasizes the role of culture, faith, and sports in shaping social norms and highlights the importance of engaging these sectors in GBV prevention efforts. The development of the Kiribati VAW Prevention Framework during the GBV Prevention Offsite workshop is another key achievement. This framework was crafted through collaborative efforts, bringing together stakeholders from various sectors, including culture, faith, and sports, to establish a unified approach to GBV prevention. The framework emphasizes the need for community engagement and the importance of changing social norms to protect vulnerable populations. Furthermore, the formulation of Standard Operating Procedures (SOPs) for Health Services and Kiribati Police Services, aimed at improving GBV response, underscores the importance of a coordinated, survivor-centered approach. These SOPs reflect an understanding of the cultural context and the need to change societal attitudes towards GBV. The Kiribati SafeNet initiative, an inter-agency coordination mechanism, has been central to these efforts, ensuring a rights-based and survivor-centered response to GBV. The SafeNet Summits, supported by UN Women, have been pivotal in engaging communities and

raising awareness about GBV prevention and response. These summits have facilitated discussions on changing social norms and have provided training on accurate GBV data collection, ensuring consistent support across all islands. In conclusion, Kiribati's approach to tackling GBV through social norms change initiatives highlights the importance of collaborative efforts across government, communities, and sectors like culture, faith, and sports. These initiatives have not only strengthened frameworks, policies, and data management systems but have also fostered a community-wide commitment to changing attitudes and behaviors, contributing to increased protection and support for women and girls facing GBV.
