STRATEGIC NOTE OUTCOME PROGRESS NOTE

SHOWING DATA OF : **2022**

Public policies and budgets at national and local levels are gender sensitive and are enhanced by comprehensive and dynamic normative frameworks and standards

During 2022, outcome 1.1 was partially achieved. In terms of gender responsive budgeting (GRB), the 2022 gender analysis of the national budgets of 38 ministerial departments has indicated progress in mainstreaming gender equality in the strategic focus of budget programmes, objectives and indicators. Out of 396 objectives, 110 are gender sensitive (28 per cent), and 184 performance indicators are gender sensitive out of a total of 812 (23 per cent). While the number of gender sensitive budget programmes increased from 64 in 2020 to 68 in 2022, gender-sensitive indicator targets observed a varying degree of achievement, namely explained by the long-term repercussions of the Covid-19 pandemic. Moreover, significant progress has been made towards achieving gender sensitive local governance. In 2022, local authorities and locally elected officials of the different regions of Morocco were supported in the implementation of gender-sensitive local planning and budgeting. UNW Morocco CO technically supported the development of a methodological guide on gender sensitive local planning and budgeting that was institutionalized and disseminated at national level to serve as a standardized framework for gender sensitive local governance.
