Number of data collection initiatives conducted or supported by UN Women that include behaviour and/or social/gender norms dimensions (CO)	(Baseline)	-	N/A
	2022 (Target)	-	1

STRATEGIC NOTE OUTCOME PROGRESS NOTE

SHOWING DATA OF : 2022

Cities and local stakeholders develop responses to develop empowering public spaces for women and girls

Significant progress was achieved for Outcome 3.2 in 2022. CSO worked to strengthen the capacities of local elected representatives and local authorities in their response to VAW by advocating for gender-sensitive local planning and budgeting. Stakeholders formulated a gender-sensitive city policy and prepared a gender-sensitive budget after learning about gender-sensitive approaches and key principles to prevent VAW in public spaces. They also have demonstrated improved understanding of gender mainstreaming techniques and tools and an improved ability to monitor the budgets of districts. UN Women support CSOs in this work by providing financial support – through a 85000 USD grant- enabling the recruitment of an expert who developed training material and facilitated trainings to local elected representatives and local authorities. Association Ennakhil developed awareness-raising modules on gender equality and safety for women and girls in public spaces, especially on how to recognize and react to GBV in public spaces. The aim of these awareness-raising workshops was to improve the participants’ understanding of gender-based violence in public spaces; to acquire knowledge of the legal framework of the fight against gender-based violence in public spaces; to understand how to take actions to prevent gender-based violence in public spaces. UNW supported the development of these modules, One of the positive externalities of this work to improve stakeholders’ abilities to develop empowering public spaces for women and girls was that the City of Marrakech (Marrakech Municipality) requested support from Ennakhil NGO to design a public green space responding to international standards and norms in terms of accessibility and safety for women and girls (gender sensitive).
