

# Country-Level Data for Mexico country Outcome XM-DAC-41146-MEX\_D\_1.1

OUTCOME MEX\_D\_1.1 [XM-DAC-41146-MEX\\_D\\_1.1](#)

**By 2025, the Mexican State plans with territorial, population and gender perspective, inclusive strategies to generate shared prosperity that reduces inequality and poverty.**

## OUTCOME DETAILS

### SDG alignment

### Impact areas

Governance and participation in public life

### Organizational outputs

Norms, laws, policies and institutions

Financing for gender equality

Gender statistics

### Policy Marker

### Outcome Description

Key stakeholders in Mexico produce and use gender-sensitive statistics so that more institutions have capacity to design, implement, monitor, and evaluate evidence-based policies with a local approach and with a gender perspective, to promote substantive equality and women participation in all sphere and for the follow-up of the 2030 agenda with gender perspective.

### UN Partners

UNAIDS

UNDP

UNFPA

UNICEF

## STRATEGIC NOTE OUTCOME PROGRESS NOTE

SHOWING DATA OF : 2022

**By 2025, the Mexican State plans with territorial, population and gender perspective, inclusive strategies to generate shared prosperity that reduces inequality and poverty.**

Considerable progress was made towards this outcome in 2022. Local authorities have better information and tools on how to incorporate women's participation and gender perspective in their comprehensive risk-management strategies. 27 officials from the Women's Secretariat and seven city halls in Mexico City are sensitized on the importance of including gender perspective in disaster risk management. Public servants know the administrative, institutional and financial areas of opportunity to integrate gender perspective. This knowledge is the result of a collaboration between UNDP, UN Women and the Secretariat for Comprehensive Risk Management and Civil Protection in the 1st workshop "Building the foundations for Comprehensive Risk Management with a perspective of gender". Local authorities have access to high-quality information and tools to better address and monitor violence against women in politics at the local level, with a focus on indigenous women. The Oaxaca State Electoral and Citizen Participation Institute (IEEPCO) and UN Women carried out the "Investigation that explores the possible relationships between gender parity and violence against women in the political sphere in municipalities governed by Indigenous Regulatory Systems in Oaxaca.", investigation results highlights still a long way to go to achieve parity in Mexican municipalities, where only 28% are governed by women and of which 5% are governed by Indigenous Regulatory Systems. Women municipal presidents, councilors and community leaders exposed needs for training, recognition within the Assemblies, economic support, legal and psychological support, as well as the guarantee of their political-electoral rights. The IEEPCO, supported by UN Women, put into operation the "Model for the registration, follow-up and monitoring of cases of political violence against women based on gender" as part of the actions to prevent, address and eradicate violence against women in Oaxaca. This is the first model at the national level that follows up on cases of political violence focusing on the victims and seeks to provide greater efficiency in access to justice and contribute to the full political participation of women. New ways to Build Spatial Data Infrastructure for Gender Equality and Sustainability, and to improve the availability of information on the demand, supply and accessibility of care services, are

available through the study: "Intra-urban indicators of inequalities of gender associated with the spatial entrapment of women". The results were disseminated in the International Seminar: "Building Spatial Data Infrastructure for Gender Equality and Sustainability", on March 22, 2022. UN agencies, governments, academia, civil society and multilateral development banks have new data and knowledge about the push factors of Central American migration and gender issues such as violence against women and girls, the impact of climate change and COVID 19, and their situation of socioeconomic vulnerability, as well as with public policy recommendations to address and respect the human rights of the migrant population. The study: "Central American migration: factors of attraction and expulsion of the Guatemalan, Salvadoran and Honduran population incorporating the perspective of gender" was developed by the CEGS in coordination with El Colegio de la Frontera Norte. Users and policymakers have a new geographic information tool to visualize the supply, demand and location of care services. UN Women through the CEGS, in partnership with INMUJERES in collaboration with El Colegio de México (COLMEX), built a National Map of Care, as a support tool for users and policy makers, that allows visualizing: a) availability and location of care services in formal establishments; b) demand for care of three population groups: children (0 to 11 years), older adults (65 years and over) and people with disabilities; c) accessibility to services for these populations and for women with and without paid work. Two knowledge products that contribute to the design and construction of the National Care System, were developed in collaboration with COLMEX: 1) "Analysis of policies, social programs and budgets, as well as the infrastructure available to contribute to the System of Care in the United Mexican States"; and 2) "Qualitative analysis that serves to support the National System of Care in the United Mexican States: construction and testing of an instrument to know the social representations of care in Mexico". The international community has a new methodological tool: "Enhancing the accuracy of gender data: Cognitive testing of wordings associated with supervisory care" to improve the operationalization of the care supervision concept in time use measurement instruments. The exploratory study was developed by the CEGS in collaboration with COLMEX, and a specialized advisor of Women Count in Asia Pacific and members of the Expert Group for the Innovation of Time Use Surveys of the United Nations Statistics Division (UNSD). Mexico's National Gender Equality Policy was strengthened with the support of UN Women by the strategic alliance with the National Women's Institute. 195 people (188 women and 7 men) have information on the full exercise of their agrarian rights, access to land, political and community participation; 23 women members of agrarian communities in 18 states of the country strengthened their capacities and leadership in the recognition of agrarian rights and/or defense of land and territory; 99 agrarian visitors (29 women and 70 men) from 20 states in the country have the elements to generate mechanisms for accompanying and assisting ejidos and agrarian communities, integrating gender, intercultural and human rights perspectives. More than 600 women in contexts of mobility were supported and participated in activities that sought to provide them and their families with psycho-social well-being. 51 journalists from national and local media were provided with practical tools and materials to adequately cover cases of gender violence and/or femicides and information on gender violence. Knowledge products were developed to strengthen the MUCPAZ Strategy; to promote regulatory changes such as the National Care System Law; to strengthen the National Policy between Women and Men and to contribute to the strategy to prevent and eradicate sexual harassment; and the virtual course "Life without violence" was developed to provide public service personnel with elements to provide first contact care to women facing violence. The production, analysis and use of gender statistics was strengthened in Mexico and in the LAC region. In particular, the importance of having information systems on care in intergovernmental mechanisms such as the Statistical Commission of the Americas (SCA-ECLAC) and the XV Regional Conference on Women was consolidated. Likewise, National Statistics Offices (NSO) and Mechanisms for the Advancement of Women (MAW) strengthened their capacities and shared their experiences to move forward in a coordinated manner on this issue, starting from the XXIII International Meeting on Gender Statistics "Care at the center of development: statistical opportunities and challenges" and the "20th International Meeting of Information Specialists on Time Use and Unpaid Work", carried out at the INEGI headquarters in Aguascalientes, Mexico. there were more than 120 face-to-face participants, including Twelve NSO and 12 MAW; there were 600 participants by zoom and more than 2,000 virtual visits to social media networks.
