STRATEGIC NOTE OUTCOME PROGRESS NOTE

SHOWING DATA OF : **2022**

Mexican State advance in the promotion, protection and respect of the full exercise of women human rights to access to justice and reparation for the entire population , especially that found in contexts of greater vulnerability, in conditions of equality and under the principle of leaving no one behind

This outcome has reached significant progress in 2022. The Ministries of National Defense, the Navy and Public Security have a better and more informed knowledge on the barriers that their personnel face to be selected and deploy in UN Peace Operations. Three reports on the barriers that limit uniformed Mexican women's deployment in UN peace operations were elaborated through the direct participation of 1,279 (48.6% women) informants based on the Measuring Opportunities for Women in Peace Operations -MOWIP- methodology. 1,235 people in uniform (48% women) provided key information through surveys on the needs, barriers and best practices regarding gender equality and UN peace operations deployment opportunities within each security Ministry. 44 officers and high-ranking officers (38% women) contributed through in-depth interviews to identify the needs, barriers, and best practices regarding gender equality within their own Ministries, UN peace operations deployment opportunities and challenges, and carrier opportunities and challenges for personnel returning from UN peace operations. The Mexican security sector has a broader knowledge of the gender barriers that uniformed women face within the federal security institutions. The Mexican security sector has a pool of best practices within each Ministry. The MOWIP Methodology, contributed to identify, systematize, and share information on the policies, procedures and other institutional measures that promotes gender equality, aim to increase women's leadership, and prevents and responds to violence against women that otherwise was blurred. The Mexican government has a clear path to strengthen its gender equality agenda within each security ministry and to increase women's nominations and deployments in UN Peace operations. Over 200 officers (30% women) from the Ministries of National Defense and the Navy, as well as personnel from the National Guard, have increased their knowledge on issues related to the Women, Peace and Security Agenda and on security with gender perspective through a series of trainings and conferences. The Federal Judiciary has high quality tools for its personnel to incorporate gender perspective and international standards on women's rights in the impartation of justice . 5,585 public servants (56% women)

strengthened their capacities, knowledge and use of tools from the gender perspective for the fulfillment of the obligations of administrative, jurisdictional and public defender personnel. UN Women supported the design of a specialized 60-hour training course "Gender as a Tool for Equality" targeted to personnel from the judicial (91%), public defense (7%) and administrative areas (2%) within the Federal Judiciary Council . This course is part of the judiciary branch on the incorporation of gender perspective in the justice sector . The Federal Government has strengthened its capacities to better address the disappearances crisis with a gender perspective. With support from CO, the National Search Commission and the National Commission to Prevent and Eradicate Violence Against Women are harmonizing the protocols for the search of disappeared women and girls in coordination with local search commissions and prosecutors' offices. Those reactive mechanisms carry out an immediate search for the location of disappeared women and girls, in order to protect their lives, personal freedom and integrity, through a coordination plan between authorities of the three orders of government, that involve the media, civil society, public and private organizations, throughout the Mexican territory.
