STRATEGIC NOTE OUTCOME PROGRESS NOTE

SHOWING DATA OF : **2022**

SN Outcome 2.3: Government departments have capacity to design and deliver safe and universally accessible public spaces (aligned to SP Output 12)

UN Women noted improved capacity at provincial and district levels in designing gender sensitive public policies on the management of markets. This was achieved through working with 9 provincial/district governments (National Capital District, Lae City, Mt Hagen, Goroka, Hela, Daru, Wewak, Vanimo, Alotau) to ensure safe market places including areas around the market such as bus stops. While progress varies across the different locations, during the consultations for the revision of the Informal Economy Policy, provincial government teams demonstrated awareness on the role of different departments in providing accessible and quality public services. For example, in Morobe, the Lae City Authority was working with provate sector to put cameras in public places as a way of curbing violence against women and girls. The Informal Economy Policy revision shows government commitment in the design and delivery of safe and accessible public spaces.
