STRATEGIC NOTE OUTCOME PROGRESS NOTE

Humanitarian actors promote gender responsive humanitarian/crisis response planning frameworks and programmes in South Sudan

The CO played a key role in filling critical gender gaps in humanitarian action. Through the GIHA trainings the humanitarian actors have now acquired skills and knowledge to conduct gender analysis to identify gender gaps to inform Humanitarian Needs Overview (HNO) and Humanitarian Response Plan (HRP) and related programming. Some have capacity to share the knowledge with their colleagues and other stakeholders UN As a member of the National Plat form for Disaster Risk Reduction (NPDRR) the CO reviewed the South Sudanese Durable Solutions Strategy for Refugees, Returnees, IDP’s and host communities as well as a community-based disaster risk management Doc -A people centered approach for disaster risk-informed community development, developed by IOM for the Ministry of Humanitarian affairs to ensure gender integration. The CO effectively lead, coordinated, and promoted accountability for the implementation of gender mainstreaming in humanitarian response through gender analysis; for example, a Gender Equality Situation Analysis for IDPs, Returnees and Host Communities in South Sudan was finalized edited, and publishing of the report is underway which will inform the HRP and other program plans. Through the cluster meetings discussions influenced the need for coordination and collaboration across humanitarian actors and the UN Country Team to ensure that joint efforts take women and girls fully into account. UN Women CO played a key role in the Grantee Selection Committee (GSC) of Education Cannot Wait selection of grantees / multi-year resilience programme. The CO was invited by the education cluster coordinator to ensure the partners selected to implement the project integrated gender in their proposals.
