STRATEGIC NOTE OUTCOME PROGRESS NOTE

SHOWING DATA OF : **2022**

Women and Girls, especially from particular groups (with disabilities, rural, sexual and gender minorities) from target countries, who experience violence have access to quality essential services (health, social service, police and justice) to recover from violence.

Women and girls have increased access to essential services, especially those from marginalized groups and geographically hard to reach locations through the ongoing partnership between UN Women and the Ministry of Women, Children and Social Development (MWCSD) to strengthen the multi-sectoral service delivery coordination and response protocols. VAWG is being proactively addressed at the at village and community levels through the launch and rollout of the Samoan Talanoa Toolkit, a first of its kind in Samoa, contributing to access to essential services, alongside primary prevention, particularly beneficial for remote and maritime women. National efforts centered on increasing awareness and access to services for women and girls with disabilities and supporting strategic planning with the incoming MWCSD CEO on the roll out and uptake of the Inter-Agency Essential Services Guidelines.
