

Country-Level Data for South Africa country Outcome XM-DAC-41146-ZAF_D_3.2

OUTCOME ZAF_D_3.2 [XM-DAC-41146-ZAF_D_3.2](#)

Favourable social norms, attitudes and behaviours are promoted at community and individual levels to prevent GBV

OUTCOME DETAILS

SDG alignment

Impact areas

 Ending violence against women

Organizational outputs

 Positive social norms

Policy Marker

GENDER EQUALITY

Humanitarian Scope

No

UN System Function

Advocacy, communications and social mobilization

Outcome Description

The outcome leverages HeforShe and men engagement working with the faith-based community to change negative societal social norms and practices including toxic masculinity, with the view of reducing intimate partner violence and other forms of violence against women.

STRATEGIC NOTE OUTCOME PROGRESS NOTE

SHOWING DATA OF : 2022

Favourable social norms, attitudes and behaviours are promoted at community and individual levels to prevent GBV

Men in the 4 municipalities of Greater, Hammanskraal, uMgungundlovu, Emalahleni and Ehlanzeni; 2 cities of Nelson Mandela Bay, and Klerksdorp as well as Mamelodi town and Themba township in the 5 provinces of KZN, Eastern Cape, Northwest Mpumalanga, and Gauteng have been influenced to change their attitudes and behaviours around gender-based violence, unequal gender relationships and HIV. Through implementing partners, UN Women contributed to strengthening communities' response to HIV & Aids and GBV by engaging men and religious leaders as agents of change to address negative social norms and gender stereotypes and leveraging the HeForShe campaign. The partnership with implementing partner SACBC, identified key sites for change (taverns, faith institutions, tertiary education institutions) in which to influence attitudes and behaviours around gender-based violence, unequal gender relationships and HIV. Four main strategies of Research and advocacy, development of toolkits, engaging communities and modelling social clubs were employed to influence change.
