STRATEGIC NOTE OUTCOME PROGRESS NOTE

SHOWING DATA OF: 2023

Caribbean people, communities, and institutions have enhanced their adaptive capacity for inclusive, gender responsive Disaster Risk Management and climate change adaptation and mitigation. (MSCDF Outcome 5)

Things are on track to significant progress being achieve towards Caribbean people, communities and institutions having enhanced their adaptive capacity for inclusive gender responsive DRM and CC adaptation and mitigation. With the focus of most of the prorgess during 2023 being on institutions that themselves engage with people and communities, this provides great scope for further scaling across the Caribbean, across other institutions and for providing support to people and communities as they themselves also strengthen their own capacity.
