STRATEGIC NOTE OUTCOME PROGRESS NOTE

SHOWING DATA OF : **2023**

People living in Indonesia, especially those at risk of being left furthest behind, are empowered to fulfil their human development potential as members of a pluralistic, tolerant, inclusive, and just society, free of gender and all other forms of discrimination

Implementation of Women Access to Justice (WA2J) program in Indonesia has achieved great strides of achievement during project period, including efforts to bridge informal to formal justice systems that facilitates increased women’s’ access to justice. Among significant changes that the project had impacted women empowerment and cultural shifts that challenge predominant norms of men and women power relations in several project locations. These changes have evidently led to increased access to justice for women and children. While the project has successfully created functional quasi-institution to put forward, it could consider moving towards building or creating linkages with strong institution and financial support to ensure sustainability of impact. UN Women collaborated with Wahid Foundation in building peace through the Women Participation for Inclusive Society (WISE) – GUYUB program (Phase II) with targets in 3 provinces including West Java (Bogor and Depok), Central Java (Solo Raya) and East Java (Malang Raya and Sumenep). UN Women provided technical assistance in introducing the Human Security Approach and technical support on communication and media.
