Extent of bias in gender equality attitudes and/or gender social norms among individuals (CO)	2021 (Baseline)	8%	N/A
	2022 (Milestone)	-	NA
	2023 (Target)	60%	Not applicable

STRATEGIC NOTE OUTCOME PROGRESS NOTE

SHOWING DATA OF: **2023**

By 2023, women and girls' safety, physical and mental health and security are increasingly assured and their human rights increasingly respected

During the reporting period and funded by CERF, the joint GBV prevention and response programme with UNFPA, reached 16,053 women, as direct beneficiaries in a coordinated humanitarian response. Moreover, included in this number are 1,290 GBV survivors and women and girls at risk who reported having access to GBV information, legal advice and assistance, psychosocial support, and referrals to GBV services. A total of 811 female headed households reported having received GBV services including mental health and psychosocial support through the GBV referrals. 811 women head of households received with cash for protection and food services. The CERF joint programme implemented jointly with UNFPA yielded several learnings that informed successful resource mobilisation and project design for a France funded and EU-funded GBV prevention and response programme (2023 – 2025). Lessons learned included a) the need to do a demand-side market analysis to inform livelihood and skill development activities; b) address business continuity in a complex and complicated context and c) safety and security of partner organisations; d) the need to address gender norms even in conflict settings.
