STRATEGIC NOTE OUTCOME PROGRESS NOTE

SHOWING DATA OF : **2023**

By 2027, the most vulnerable populations, particularly women, girls, boys and people with special needs, improve: their food and nutrition security, management of natural resources and living environment, and strengthen their resilience to climate change including in areas affected by conflicts (Outcome 3 UNSDCF).

women in Niger were severely affected by climate change. In March 2023, analysis of the Harmonized Framework in Niger estimated that, as a result of climate shocks, some 2,454,354 people are food insecure (phase 3 and +) and 398,060 people are under pressure (phase 2). From June to August 2023, it is estimated that almost 3.3 million people will be food insecure (phase 3 and +) and 7,341,355 people under pressure (phase 2). This poses a major challenge for the government and humanitarian actors. In response, UN Women has developed support programs, and mobilization is underway despite the political challenges that are becoming ever-present. and in 2023, o Another 400 beneficiaries have been strengthened to increase their economic resilience in the face of climate change and security crises. Priorities for supporting women, girls, people with disabilities, migrants, refugees, etc. of the year 2024 will be identified in the data collected from the database of 3468 interest groups listed in the regions of Diffa, Maradi, Niamey, Tahoua and Zinder.
