STRATEGIC NOTE OUTCOME PROGRESS NOTE

SHOWING DATA OF : **2023**

By 2027, Nigeria benefits from improved food security and nutrition, sustainable food systems, and natural resources management

In 2023, the CO faced limitations in implementing interventions for a particular indicator due to constrained resources. Despite this challenge, the CO actively engaged with various donors to mobilize funds for the agriculture sector. Notably, a comprehensive climate-smart agriculture program was developed in collaboration with the African Development Bank, which is currently being considered as a potential donor. Recognizing the government's role as a regulator, the CO worked at both national and sub-national levels to advocate for affirmative procurement reforms. At the national level, technical support was provided to develop Nigeria's inaugural Women Economic Empowerment Policy. This policy, including affirmative procurement as a key driver of economic empowerment, received approval from the president. A high-level advisory council, with UN Women as the secretariat, was established. Additionally, at the subnational level, the Kaduna State Government drafted an affirmative procurement policy with a specific quota for women-owned businesses. In Lagos State, gender-responsive procurement clauses were included in procurement regulations and guidelines. However, approval of these documents is pending with the respective state governors, with delays attributed to the general elections and changes in government in 2023. Furthermore, the CO conducted gender-responsive assessments of the mining and maritime sectors in Nigeria, aiming to identify specific gender lens policies for advancing gender equality and women's empowerment in these sectors. Additionally, the CO developed project documents focusing on specific agriculture value chains showing significant potential for advancing gender equality and empowering women in agriculture. These initiatives are strategically designed to maximize their positive impact. Lastly, in response to the removal of fuel subsidies in Nigeria and the growing demand for alternative energy sources, the CO initiated a successful pilot program on biogas. There is now interest from potential donors willing to support the scaling up of this initiative in 2024.
