STRATEGIC NOTE OUTCOME PROGRESS NOTE

SHOWING DATA OF : **2023**

[UNSDCF Prosperity Outcome] By 2027 People in the United Republic of Tanzania working in MSMEs and small-scale agriculture, especially the most vulnerable, achieve increased, more sustainable productivity and incomes with more equitable access to productive resources (verbatim)

Results: Remarkable strides and a more conducive environment for women to thrive in trade, secure formal and informal employment, engage in entrepreneurship, and contribute significantly to economy have been achieved. At the national level the results have been attributed by the government sustained institutionalisation of GEF and progressive transformative projects in alignment with GEF commitments and capacity enhancement to government officials both at the central and national levels. Through the joint programme on rural women's economic empowerment, more women have reported increased agriculture productivity, improved food security and nutrition for rural women and their households that contribute to equitable and sustainable food systems. Notable results for women include established home gardens ensuring year round food security for women, Women are having more access to productive agricultural land. In Dodoma and Singida, women and men smallholder farmers received certificates of Customary Right of Occupancy (CCROs) to rural women and men, whereby 5050 women have been able to access land. Two distinct types of certificates were distributed: individual certificates/deeds and dual/twin certificates/deeds designed for spouses. Post harvest loss decrease due to practical training on application of post harvest loss and reduction in storage techniques which has contributed to increase of farmer and SME incomes. UN Women contribution: implementing partners with FAO, WFP, IFAD on the JPRWEE programme complementing interventions aimed at increased access to income and productivity for women and MSMEs. Evidence : GEF progress reports and JPRWEE annual joint report
