

# Country-Level Data for Indonesia country Outcome

## XM-DAC-41146-IDN\_D\_3.1

OUTCOME IDN\_D\_3.1 [XM-DAC-41146-IDN\\_D\\_3.1](#)

People living in Indonesia, especially those at risk of being left furthest behind, are empowered to fulfil their human development potential as members of a pluralistic, tolerant, inclusive, and just society, free of gender and all other forms of discrimination, and violence against women

### OUTCOME DETAILS

#### SDG alignment

#### Impact areas

Ending violence against women

#### Organizational outputs

Positive social norms

Access to services, goods and resources

#### Policy Marker

GENDER EQUALITY

#### Humanitarian Scope

#### Outcome Description

UNSCDF Outcome 1: People living in Indonesia, especially those at risk of being left furthest behind, are empowered to fulfil their human development potential as members of a pluralistic, tolerant, inclusive, and just society, free of gender and all other forms of discrimination

No

**UN System Function**

Advocacy, communications and social mobilization

Capacity development and technical assistance

Comprehensive and disaggregated data (discontinued)

Integrated policy advice and thought leadership

	2025 (Target)	-	-

## STRATEGIC NOTE OUTCOME PROGRESS NOTE

SHOWING DATA OF : 2023

**People living in Indonesia, especially those at risk of being left furthest behind, are empowered to fulfil their human development potential as members of a pluralistic, tolerant, inclusive, and just society, free of gender and all other forms of discrimination, and violence against women**

The outcome is on track, and some progress has been achieved during this reporting period. The number of cases reported by the National Commission on Violence Against Women (NCVAW) in 2023 increased to 4371 from 4322 cases in 2022. This may indicate increased awareness of women and girls victims of GBV to seek help and report their cases, resulting from better access to coordinated quality services. During the reporting period, through UN Women's support, government and non-government organizations are able to enhance coordinated quality service provision for women and girls victims of VAW and trafficking. At the National level, the Ministry of Health is able to design measures of HIV/AIDS prevention and response that are gender-responsive after receiving technical support from UN Women to draft a bridging document of the HIV National Action Plan 2024 – 2026. This NAP contains recommendations to assess policies, programs, and services through a gender lens, to mainstream gender into program design and implementation, and to implement human rights principles. In addition, the knowledge and capacity of the Ministry of Foreign Affairs, Komnas Perempuan, Health Service Providers, and non-government organizations at the national and local levels have increased through various technical support provided by UN Women such as training, workshops, seminars, consultation meetings and awareness raising activities. Komnas Perempuan reported that their capacity to respond and handle in-coming VAW complaints is now better and more timely after enhancing their data system infrastructures and tools and increasing the number of their complaint officers (UPR) staff. It

has also increased its capacity to improve the production of data on VAW, including femicide, VAW migrant workers, and those living with HIV. Regarding data on WLHIV who have experienced violence since 2023, Komnas Perempuan received the report from IPPI, the national WLHIV network, which UN Women also supported to produce this report from 10 provinces. The lessons learned from this initiative to document cases of violence against WLHIV and developing the DELILA reporting system at IPPI also indirectly enhance the use of enabling technology for women living with HIV, especially at IPPI as a women's organization and Complaint Receiving Officers in 10 provinces as well as the WLHIV subjected to violence have access to reporting their cases. IPPI is currently available in 28 provinces; there's potential to scale the documentation beyond 10 provinces to obtain more data regarding WLHIV subjected to violence. Apart from that, with the formation of Puan Lingkar HIV, there is potential to expand the capacity of more women's organizations in the HIV circle to be able to document cases of violence against women so that reports related to HIV issues can be enrich and contribute to VAW national data, especially at the National Commission on Violence Against Women and Ministry of Women Empowerment and Child Protection (MoWECP).
