STRATEGIC NOTE OUTCOME PROGRESS NOTE

SHOWING DATA OF : 2023

By 2027, more people, especially those at risk of being left behind, contribute to and benefit from sustainable, resilient, diversified, inclusive and human-centred socio-economic systems with decent work and equal livelihoods opportunities, reducing inequalities and ensuring shared prosperity [PCF Strategic Priority 3: Prosperity]

This outcome is on track. In 2023, Vanuatu found itself in the throes of a six-month State of Emergency, a period that marked a pivotal shift in the nation's priorities. During this time, the Government of Vanuatu redirected its focus and resources, galvanizing efforts towards critical response and recovery endeavours. This urgent pivot was necessitated by the aftermath of three catastrophic tropical cyclones and a 6.6 magnitude earthquake, wreaking havoc on infrastructure and homes across the nation. As a result, the momentum toward advancing new policies with government partners was slowed down, halting the progression of market ordinances and Standard Operating Procedures (SOPs) that had been poised for adoption. Despite the economic and environmental challenges and setback in the policy development process, in Vanuatu, UN Women through the Markets for Change (M4C) project continued its work in the markets by promoting sustainability, resilience, diversification, inclusivity, and human-centeredness, while providing decent work and equal livelihood opportunities for individuals, especially women market vendors. Individuals, particularly women market vendors, are prioritized in the human-centered socio-economic approach undertaken by the Markets for Change (M4C) programme. Through a multifaceted strategy encompassing capacity building, resource access, and women's leadership development, these efforts aim to enhance the well-being and agency of all members of society. By emphasizing dignity, agency, and prosperity, these initiatives contribute to a more compassionate and equitable socio-economic landscape. Market Vendors Associations (MVAs) continue to be the backbone of support for market vendors, particularly women, championing their welfare and ensuring that economic development initiatives are tailored to meet their specific needs. The leadership of twelve women executive members from six MVAs in Vanuatu is evident in their effective governance and participation in decision-making processes within their respective associations. These women leaders play a crucial role in elevating the voice and agency of women market vendors and shaping their MVAs into inclusive, efficient, and representative advocacy groups. By providing platforms for vendors to voice challenges and recommend solutions, MVAs contribute to a more resilient marketplace. The MVAs proactively engage with stakeholders, for the collective benefit of vendors, such as through consultations with government bodies like the Shefa Provincial Government and leading vibrant community events like the International Day of Rural Women celebration. In 2023, a dedicated emphasis on inclusive and sustainable socio-economic development, particularly aimed at women market vendors in the informal sector, prioritized resilience for the long-term viability of businesses, livelihoods and prosperity in Vanuatu. Central to this resilience-building effort were capacity-building programmes tailored

for women market vendors. These equipped 490 women market vendors with essential skills and resources, including financial literacy training and access to mobile money apps, enabling them to better withstand and recover from crises. Additionally, agricultural training focused on resilient farming practices empowered vendors to adapt to climate variability and mitigate the impacts of natural disasters on their livelihoods. Furthermore, the women market vendors had improved access to and utilisation of essential services, resources, protective goods and information through the programme. By addressing specific needs and challenges faced by women vendors, such as gender-based violence services and maternal health, the programme has created a more supportive and inclusive marketplace environment. This has broken barriers to access and empowered women market vendors to actively engage in economic activities and decision-making processes to support a landscape where all individuals can thrive and contribute to economic growth. Market administrators in Vanuatu continue to grow in their capacity to provide support to market vendors to enhance decent work conditions. Through their emphasis on promoting gender equality and embracing a collaborative, inclusive approach to socio-economic development, these institutions guarantee that decision-making processes at both the local and provincial levels are responsive to the diverse needs of market vendors. In 2023, the work of market administrators focused on the ensuring safe and hygienic marketplaces and tackling the real-life challenges encountered by vendors, ranging from damages to market shelters due to natural disasters to issues concerning land resources. Importantly, the initiative extends its impact beyond safeguarding against potential pandemics and diseases, to also instigate a cultural shift within the marketplace. By promoting a culture of collective responsibility, a collaborative community environment is being nurtured among all stakeholders. This holistic approach to health and safety represents a fundamental behaviour change, emphasizing shared responsibility marketplace well-being and prosperity.
