SHOWING DATA OF : 2023

**More women and girls in West and Central Africa have equitable access to high quality public goods, services, and resources that are responsive to their needs in Peace, Security , Humanitarian and Disaster Risk Reduction (DRR) settings.**

WCARO adopted the following specific strategies aiming to improve women's access to humanitarian response: establishment of group of expert on gender and humanitarian action ( GIHA Group) in the region, advocacy , capacity building of key humanitarian actors, and specific support to women's organizations. UN Women has focused on building skills and providing tools to humanitarian actors (government Ministries, NGOs, regional women's networks and platforms, women led organizations, Humanitarian Country Teams (HCTs), UN agencies) to enable them to integrate gender in the design of interventions several countries in West and Central Africa. In Niger under the leadership of the Humanitarian Gender Theme Group, a Gender Alert highlighted the effects of

sanctions by sub-regional bodies (ECOWAS and the West African Monetary and Economic Union (UEMOA) on women and girls after the military coup as a contribution to the UN's dialogue on limiting the negative impact of the sanctions on humanitarian assistance in the country. UN Women in partnership with NorCap is currently supporting women's organizations that are working on humanitarian and disaster risk reduction issues in the Sahel region. UNWOMEN created space for them to interact with key decision makers and present their priorities and some solutions to different crisis particularly in the context of transition. UN Women coordinates the Regional and national Gender and Humanitarian Groups which include 30 experts from main international agencies and NGOs working in the humanitarian field A group of 20 women have developed their expertise on gender and DRR and influence through advocacy different DRR processes at the national and regional level including the AU Group on DRR
