OUTCOME ALB\_D\_1.2 [XM-DAC-41146-ALB\\_D\\_1.2](#)

By 2026, all persons benefit from, and contribute to, innovative and integrated policy solutions that accelerate sustainable, productive and inclusive development, enhanced climate change adaptation and mitigation and transition to a green and blue economy (UNSDCF Outcome B).

### OUTCOME DETAILS

#### SDG alignment

#### Impact areas

Women's economic empowerment

Women, peace and security, humanitarian action and disaster risk reduction

#### Organizational outputs

Access to services, goods and resources

#### Policy Marker

GENDER EQUALITY

#### Humanitarian Scope

#### Outcome Description

Inclusive, resilient economic development and shared prosperity (including effective skills training), decent, formal sector jobs, entrepreneurship, support for green and blue economy transitions and increased production and incomes from agriculture, fisheries and aquaculture, greater climate and disaster resilience and effective management of natural resources

No

**UN System Function**

## STRATEGIC NOTE OUTCOME PROGRESS NOTE

SHOWING DATA OF : **2023**

**By 2026, all persons benefit from, and contribute to, innovative and integrated policy solutions that accelerate sustainable, productive and inclusive development, enhanced climate change adaptation and mitigation and transition to a green and blue economy (UNSDCF Outcome B).**

Significant progress was made in 2023 to achieve this outcome. Businesswomen, entrepreneurs, and artisans experienced a more enabling environment to contribute to a sustainable, productive, and inclusive development. UN Women contributed to this result by leveraging a stronger engagement with the private sector, and in collaboration with other stakeholders at the central and local level. Decision-makers and stakeholders in Albania spotlighted women entrepreneurship, initiating a dialogue on the importance of promoting women’s economic empowerment. During the first Satellite EXPO on Women Entrepreneurship, a spin-off of the Regional EXPO organized by the CO, 151 Albanian women entrepreneurs accessed regional networks. Approximately 40 of these entrepreneurs further accessed opportunities for business growth and networking during the Tirana Satellite Expo, organized by UN Women, in close partnership with public institutions, the European Bank for Reconstruction and Development, the Chamber of Commerce, and private sector companies (many of which are signatories of the Women Empowerment Principles). This initiative marked the culmination of years of methodical work to expand the CO’s pool of WEPs companies and foster closer collaboration with the private sector. The Ministry of Entrepreneurship and Business Climate increased their engagement with UN Women, taking the lead during the entrepreneurship week in 2023. Rural women entrepreneurs will manage two incubators established in the LGUs of Elbasan and Kolonja. Two groups of more than 30 women from rural areas of Elbasan and Kolonje increased their capacities in areas including entrepreneurship, doing business, product sales and marketing and farming practices. These improved skills will enable rural women in the two municipalities to operate two traditional product incubators, expected to be operational in early 2024. In addition, rural women will have a stronger voice in decisions

effecting their community development through active participation in the Local Action Groups, which are being established in Elbasan and Kolonje. UN Women partnered with the Ministry of Agriculture and Rural Development, FAO and municipalities for the establishment of the incubators and promoting the establishment of the LAGs. UN Women ensured an increased women's presence and importance in the handicraft value chain in two municipalities of Albania. Local government partners increased their commitment towards promoting women's economic empowerment, providing dedicated space for the development of handicraft value chains. Through close collaboration with municipalities of Kruja and Kavaja, affected by the deadly 2019 earthquake, women artisans now have a physical space, which can be used free of charge, and a dedicated webpage to sell handicraft products. Over 20 women increased capacities in development of joint marketing, branding and joint promotion of products, market presentation of the VC and formalization of their businesses. UN Women played a vital role by following a systematic approach towards establishment of services and structures to support the development of the value chain. In turn, local government units positively responded by providing spaces for artisans' professional growth, like artisan centers and offering a dedicated webpage for women artisans in Kruja municipality. The theory of change for this outcome is still valid based on progress achieved so far. UN Women has strategically expanded its collaboration with private sector companies to advance its women empowerment agenda. The results in this outcome have been generously supported by the Government of Italy and the Italian Agency for Development Cooperation (AICS) in Tirana, the Government of Sweden through the Multi-Partner Trust Fund, and thanks to leveraging minimal Core funds within the CO for the expansion of the partnership with the private sector.
