	2024 (Milestone)	–	–
	2025 (Target)	–	–

STRATEGIC NOTE OUTCOME PROGRESS NOTE

SHOWING DATA OF : 2022

Normative and policy frameworks are promoted and adapted in line with international standards, and institutions have the commitment, knowledge and capacities to legislate, plan, implement and monitor policies to address VAW and femicide

In 2022, the province of Jujuy achieved the goal of establishing the Advisory Council mandated by the emergency Law on Gender based violence adopted in 2020. Hence, the province -once rated as the one with the highest femicide rate of the country- now has a multistakeholder institutional space for coordination, monitoring and evaluation of public policies on gender equality and gender- based violence, including femicide. Small women’s organizations were strengthened thorough an innovative process supported by UN Women, securing a space for NGOs without legal registration but proven record of work and experience addressing gender-based violence. In 2022 the Ministries of Security of Salta and Jujuy strengthened their capacities for training police officers and now can better address gender-based violence cases with UN Women support. These tools will also allow the Ministries of Security to mainstream gender in the education process of all new staff, thus ensuring sustainability of UN Women’s support. In addition, as a result of the advocacy work developed with the assistance of UN Women, 10 local governments of the province of Salta signed commitments to establish special services for women with disabilities experiencing gender-based violence, thus advancing in the intersectional approach to gender-based violence prevention, assistance and eradication. Finally, over 3 million people were reached through an online and radio campaign that widely expanded the voices, messages and priorities of civil society leaders with the support of UN Women. In a country renowned for its vibrant and progressive women’s movement; strategic partnerships with civil society organizations are key.
