

Country-Level Data for Afghanistan country

Outcome XM-DAC-41146-AFG_D_3.2

Data as of:
29 March 2024

OUTCOME AFG_D_3.2 [XM-DAC-41146-AFG_D_3.2](#)

Favorable social norms, attitudes, and behaviors are promoted at individual, community and institutional levels to prevent VAW

OUTCOME DETAILS

SDG alignment

Impact areas

Ending violence against women

Organizational outputs

Positive social norms

Access to services, goods and resources

Women's voice, leadership and agency

Policy Marker

GENDER EQUALITY

Outcome Description

The interventions in this outcome aim at implementing the community-based prevention programmes by integrating faith and other key community strengths to create gender transformative social change. The initiatives identify and build upon what have already worked in Afghanistan in terms of primary prevention and social norms programming.

STRATEGIC NOTE OUTCOME PROGRESS NOTE

SHOWING DATA OF : **2022**

Favorable social norms, attitudes, and behaviors are promoted at individual, community and institutional levels to prevent VAW

There is no change to report in 2022 for Afghanistan. Due to the Taliban takeover, it has not been possible for UN Women Afghanistan to work with national stakeholders and duty bearers in the area of primary prevention. Overall, however, UN Women Afghanistan has observed a regression due to a complex context and a scenario in which women's rights are constantly violated whilst they are systematically excluded from public and political life. Women and girls in Afghanistan are experiencing and refers to what is happening as gender apartheid. And, considering the impossibility to talk about women's rights and the need to prioritize the safety and security of staff and partners, it was not possible to implement and measure progress on prevention interventions. Despite challenges since the Taliban take over, UN Women strategy during the reporting period was focused on advocating to reopen Family Resource Centers (FRC) and Women Protection Centers (WPC) with the aim of creating safe spaces for women and girl survivors and those at risk of violence to access essential services and awareness sessions, which have reached at least 1,673 people (f-860; m-813). Furthermore, UN Women continued to explore opportunities to progress capacity building of stakeholders on ERAW prevention and response, including as part of the redesign of the ERAW Services. UN Women continued developing and enriching the Capacity Development Plan on Gender, VAWG and Survivor-centered approach for the FRCs and the WPCs partners. The plan integrates prevention and service pillars to provide a holistic approach to VAWG. This component is critical to contribute to the shift in social norms to challenge the normalization of violence among women. Thus far the original strategy and ToC for this outcome is largely still applicable. However, the renewed risk to safety and security, movement

restrictions and ban on NGO workers, will have extensive impacts on the feasibility of women and girl survivors and those at risk of violence to access quality, comprehensive services. This also comes with risks and anticipated regression on progress and operations. Therefore, the ToC and accompanying programme strategy is being reviewed for 2023 to allow for greater flexibility, innovation and focus on prevention.
