OUTCOME APA_D_2.3 XM-DAC-41146-APA_D_2.3

Needs of women are better addressed by climate change and disaster risk reduction actions for ensuring alternative climate-resilient livelihoods

OUTCOME DETAILS

SDG alignment

Impact areas

Women's economic empowerment

Organizational outputs

Norms, laws, policies and institutions

Financing for gender equality

Access to services, goods and resources

Women's voice, leadership and agency

Outcome Description

This outcome focuses on ensuring that the needs of all women and girls are addressed coherently including through strategies to make sure women have a voice and leadership, ensuring there is comprehensive and disaggregated data available for policy-makers, supporting women's entrepreneurship and economic livelihoods through renewable energy, and making sure that normative and policy frameworks on climate change and DRR incorporate gender equality and human rights.

UN Partners

STRATEGIC NOTE OUTCOME PROGRESS NOTE

SHOWING DATA OF : 2022

Needs of women are better addressed by climate change and disaster risk reduction actions for ensuring alternative climate-resilient livelihoods

Governments and intergovernmental organisations including the Association of Southeast Asian Nations (ASEAN) and the International Centre for Integrated Mountain Development (ICIMOD) articulated greater commitments to collaborate and advance gender equality in climate change to deliver more inclusive outcomes. Key to this was the adoption by the ASEAN Centre of Energy of the Roadmap on Accelerating ASEAN Renewable Energy Deployment through Gender-Responsive Energy Policy ,with technical support from UNEP. The chair of the Renewable Energy Sub-Sector Network of the ASEAN Energy Cooperation has adopt it and a strong commitment was made to implement the actions and monitor the results. The roadmap will inform the ASEAN long-term renewable energy roadmap that is currently under development, with clear gender targets and indicators. Similalry, climate change was identified as a key priority for technical cooperation between the ASEAN Committee on Women (ACW) and UN Women, reaffirming the commitments in the ASEAN-UN Women Joint Work Programme. The development of the sub-regional flagship reports on the State of Gender Equality and Climate Change in South Asia and the Hindu Kush Himalaya and Southeast Asia to identify gaps and scalable actions serve as key policy too. Findings and recommendations of the ASEAN report has informed the ASEAN Committee on Women (ACW)/ASEAN Commission on the Promotion and Protection of the Rights of Women and Children (ACWC) workplan and the actions of different sectoral bodies working in climate change, agriculture, DRR and renewable energy. In the reporting year, governments and institutions from over 18 countries have strengthened capacities to integrate gender equality priorities in climate, renewable energy, and disaster risk reduction policies and plans. Governments adopted gender-responsive climate change and disaster risk reduction policies at the country level including the Bangladesh Climate Change Gender Action Plan and the Viet Nam Climate Change Strategy to 2050 through policy guidance, capacity building, and dialogues. These policies and frameworks brought opportunities for increased investments in addressing gender and social inequalities and building long-term resilience for women and vulnerable communities. Women entrepreneurs and women-enterprises have stratengthened capacities for resilient livelihoods as a result of trainings and increased access to renewable energy financing

mechanisms. A total of 473 women have established or improved livelihood activities and over 1,689 women receiving indirect economic benefits such as improved standard of living due to access to basic services including water, reduced health and protection risks due to accessible and cleaner energy sources, and time saved due to availability of products and services in their communities. Over 56 women's rights and civil society organizations participation and leadership were strengthened in climate and disaster risk reduction dialogues and decision-making processes. CSOs have broadened networks, increasingly engaged in dialogues with governments, and has led community- based climate and DRR actions. Overall, UN Women in partnership with UNEP, through the joint project EmPower Women for Climate Resilient Societies together with its partners, provided integrated support aimed, leveraged platforms, fostered partnerships, and placed gender equality and human rights in the spotlight, creating a foundation for amplifying and scaling up results.
