OUTCOME BIH_D_3.3 [XM-DAC-41146-BIH_D_3.3](#)

By 2025, people have access to better quality and inclusive health and social protection systems

OUTCOME DETAILS

SDG alignment

Impact areas

Ending violence against women

Organizational outputs

Norms, laws, policies and institutions

Policy Marker

GENDER EQUALITY

Humanitarian Scope

No

UN System Function

Advocacy, communications and social mobilization

Outcome Description

Work will focus on scaling and further enhancing quality of policy, protection, and prevention efforts based on Istanbul Convention standards. At policy level efforts will focus on supporting the governments to harmonize their legal and policy framework with the Istanbul Convention, work will be; a) experience and good practices in responding to and preventing VAW and DV identified in previous work, b) ensuring localized minimum standards for service provision. To strengthen protection systems, focus will be on enhancing access to multi-sectoral and a survivor-centered protection system with resources that meet the needs of victims and survivors. There are two primary focuses: a) monitoring and mentoring, to support the work on coordinated response in local communities, b) standardization of the quality of response by first responders, ensuring that quality assurance and monitoring mechanisms related to service provision to survivors are introduced and applied in at least 1 sector.

STRATEGIC NOTE OUTCOME PROGRESS NOTE

SHOWING DATA OF : 2022

By 2025, people have access to better quality and inclusive health and social protection systems

Throughout the year progress was made in regard to achieving this outcome as a result of multiple interventions towards the standardization of institutional and civil society response to cases of violence against women and driving local communities' solutions towards prevention. Entity Gender Centers are providing s standardized and quality service trainings for members of multisectoral teams in order to develop/revise local protocols in accordance with the international standards in 25 municipalities in BiH. The Federal Ministry of Interior has access to the tools for standardization of the police response to violence against women and domestic violence cases and recommended these for use to the cantonal ministries. Gender Centre of Republika Srpska developed the General Protocol on handling cases of domestic violence in the Republika Srpska with UN Women's technical support which) is the first step; it must be adopted and implemented in practice .General protocol was signed by six Ministries (Ministry of Internal Affairs, Ministry of Health and Social Protection, Ministry of Education and Culture, Ministry of Administration and Local Self-Government, Ministry of Justice and the Ministry of Family, Youth and Sports). . Action plans will be developed for each ministry to apply the guidelines in practice. For example, centers for social work will adopt special regulations for dealing with victims of sexual violence. Civil society organizations strengthened their capacities in research-based advocacy for enhancement of legislative framework for protection from sexual violence focused on the standardization of judiciary response to cases of sexual violence with the support of BiH High Judiciary and Prosecutorial Council and Entities's Training Centers for judges and prosecutors and UN Women. Initial national efforts for developing an evidence-based approach and systematic response to cases of sexual violence have been supported through a consortium of seven women's CSOs- member of the Safe Network. With the support of UN Women, the

capacities of professional staff in the 8 safe houses that work with victims of sexual violence strengthened their capacity through the improvement of knowledge and expertise for providing help and support to victims of sexual violence. Additionally, standards have been improved for safe house records on the specialized support services provided for victims of domestic violence through the creation of a software database that is currently in the test phase and will be installed in eight organizations that run safe houses in Bosnia and Herzegovina. In terms of VAW prevention, UN Women supported national women and youth CSOs in implementation of the comprehensive methodologies for prevention of Violence Against Women and Girls (VAWG) including sexual harassment in public spaces. Six local communities apply “Communities that Care” approach involving youth, men and boys, community and non-traditional leaders in preventive activities. Banja Luka City applies in collaboration with the Foundation United Women Banja Luka the global UN Women Safe Cities Safe Public Spaces program focused on combating sexual harassment in public space. A 16 days campaign on raising awareness on sexual violence has been conducted in five cities across BiH and via social media talking harmful attitudes around consent, marital rape and sexual harassment. Over 2,000 people across BiH directly participated and over 216,000 reached social media. Furthermore, under the same campaign UN Women facilitated thematic discussions with 20 experts in VAW and representatives of institutions and CSOs. The discussions resulted in a set of recommendations for enhancement of two entity criminal codes to ensure protection of survivors in line with the Istanbul Convention for entity governments, ministries of justice and wider expert community. As a result of the multiple interventions and UN Women support in 2023 the legislators and institutions have enhanced capacities to incorporate the highest level of international standards on EVAW in legislation and policies, local communities including women, girls, men and boys are able to mobilize resources to create an environment for zero tolerance to violence; and service providers have capacities to deliver quality, accessible and survivor-centered services, thus far the original strategy and ToC for this outcome is largely still applicable.
