OUTCOME FIJ_D_2.4 [XM-DAC-41146-FIJ_D_2.4](#)

Markets physical infrastructure and operating systems are improved to make them more sustainable, resilient to disaster risks and climate change, safer and more accessible

OUTCOME DETAILS

SDG alignment

Impact areas

Women's economic empowerment

Organizational outputs

Access to services, goods and resources

Policy Marker

GENDER EQUALITY

Humanitarian Scope

No

UN System Function

Outcome Description

This outcome is about increasing women's voices in developing appropriate infrastructure that is safe and accessible--so this has elements of public safety, plus disaster preparedness and response as well as women's voice and participation. Work under this outcome brings together women leaders of market vendor associations with government planners to ensure that women's voices are included in the planning of infrastructure development.

STRATEGIC NOTE OUTCOME PROGRESS NOTE

SHOWING DATA OF : **2022**

Markets physical infrastructure and operating systems are improved to make them more sustainable, resilient to disaster risks and climate change, safer and more accessible

Marketplace safety is being improved through the Markets for Change project in Fiji, addressing issues such as personal safety and disaster risk resilience. Knowledge and understanding of disaster preparedness is being improved across markets as part of the implementation of Market Disaster Management Action Plans. In addition, relationship building by market management with external disaster management stakeholders, such as the National Disaster Management Office is continuing. To address barriers to gender-responsive infrastructure development, marketplace infrastructure projects are developed in consultations with women and men market vendors, including vendors with disabilities. In Fiji, close to 200 members of three Market Vendor Associations were consulted by UN Women for the design of their planned new market structures and associated accommodation centres. The perspectives and feedback from the market vendors will be a priority in the design of these structures. This has included vendor concerns around safety, security and accessibility. In 2022, two Category 5 cyclone-resistant women's accommodation centres were officially opened in Fiji. The Nausori Women's Accommodation Centre was officially opened in April 2022 and can accommodate 80 rural women vendors at a time, offering a secure location for women market vendors from several rural provinces. The newly refurbished Ba Market Women's Accommodation centre that can house 50 rural women market vendors was officially opened in August 2022. Secure and safe marketplaces allow market vendors who travel long distances to markets to stay overnight to continue selling the next day. In the case if disasters strike, such as floods and cyclones, which occur frequently in Fiji, rural women market vendors will have a safe place to stay when away from their homes. UN Women provided financial and technical support through the Markets for Change project for improving market physical infrastructure and operating systems.
