Number of tailored knowledge products made available by UN-Women to the Commission on the Status of Women and the Security Council to strengthen the development of gender-responsive intergovernmental outcomes (Desk Review)	2022 (Target)	-	-

STRATEGIC NOTE OUTCOME PROGRESS NOTE

SHOWING DATA OF : **2022**

Evidence and norms on gender equality and empowerment of women and girls are promoted by government and civil society.

The Country Gender Equality Profile (CGEP) was launched in March 2022 under the patronage of the IMC Chair and was organized in cooperation with the Economic Social Council. The UN Women supported its development to be a primary source for evidence-driven advocacy and programming for national stakeholders, international development partners and the UN System to advance the gains and overcome bottlenecks at the national, regional, and global level based on both statistical and qualitative data. The CGEPs was developed in an inclusive manner, ensuring participation of the national statistical office (NSO) and with the ministries responsible for action on and monitoring of the SDGs in key thematic areas (e.g. health, education, defence and justice). Civil society and gender equality advocates at all levels and, within this, ensuring that marginalized groups most at risk of being left behind is represented like the Higher Council for the Rights of Persons with Disabilities. As the profile provides valuable in-depth analysis of the different social and economic challenges faced by women and girls, this can be used as a tool to inform evidence-based decision making at the national level. https://jordan.unwomen.org/en/digital-library/publications/2022/03/general-framework-for-gender-equality-in-jordan
