## STRATEGIC NOTE OUTCOME PROGRESS NOTE

SHOWING DATA OF : **2022**

### Improved use of gender statistics by different players to inform advocacy, research, policies and programmes

Significant progress was made towards the achievement of outcome 1.4 in 2022. In 2022, the High Commission for Planning (HCP) developed, online platforms, infographics, communication material with the aim to make gender statistics more accessible and user-friendly, while also improving stakeholders use of these statistics. Morocco CO provided technical support to the HCP for the drafting of ToRs to recruit experts/consultants who developed a set of online tools and user-friendly knowledge products to enhance the accessibility and availability of gender statistics. For instance, the HCP (NSO), with the technical and financial support of UNW Morocco CO developed (i) an ergonomic platform dedicated to gender-sensitive statistics; (ii) Infographics of key results of household satellite accounts published in 2014; (iii) two videos to present the main results of the VAW survey (published both in French and Arabic to reach a larger audience) and (iv) a web platform and a video on the gender analysis. Here is the link to platform: [http://plateforme-odd.hcp.ma/ODD\\_HCP/fr/](http://plateforme-odd.hcp.ma/ODD_HCP/fr/) This platform will also allow the HCP to monitor the progress of the use of statistics as it allows to generate accurate reports on the number of data users and producers having accessed the platform.
