STRATEGIC NOTE OUTCOME PROGRESS NOTE

SHOWING DATA OF : **2022**

By 2025, the Mexican State has decent work programs to address labor market needs, including institutional strengthening, job training, formalization, women's economic participation, protection of rights, social mobility and labor justice.

This outcome has reached significant progress in 2022. 2,763 marginalized women have improved skills and access to more education, employment and entrepreneurship opportunities, enrolled in the Second Chance Education (SCE) Program through 15 SCE learning centers. The women have access to 69 courses to strengthen their knowledge and skills to continue their formal studies, acquire a job or start their own business. Since the beginning of the Program, a total of 7,787 women enrolled. Moreover, 243 women increased their financial inclusion, resilience and health, through the financial inclusion course in collaboration with UNDP. After course, it can be observed an increase between 28% and 12% of women saving money; an increase between 31% to 5% on women having financial goals; an increase between 44% to 22% of women keeping record of their incomes and expenses; and a reduction between 32% and 21% of women not knowing what to do, if they lose their income resource. During this year 502 women were employed; 1,064 have started a business; and 627 returned to formal education. Moreover, 893 graduates developed their leadership skills by offering support to other participants through mentorships. 351 graduates received training to become mentors, and 542 of them offered advice and courses organically. From a sample of SCE participants, 41% of women with an employment or entrepreneurship said they got it due to their participation in SCE program. Within 3 months after graduating the Program 74% of participants took entrepreneurship courses and 67% from them reported to start their business once they finish their training and all of them would recommend this training to other women. Moreover, half of the participants who took employment courses got a job after finishing their SCE training. The private sector incorporates gender equality and women's empowerment as key objectives, understanding that it benefits their business and society . Private sector companies not only use tools such as the Women's Empowerment Principles (WEPs) to implement actions for gender equality, but they also measure, report them, make public commitments, and invite other companies to drive change in their industry. 191 companies are among the WEPs Signatories on the WEPs website . Three public events of WEPs adhesions were held. The first one was organized by

Abogadas MX , where 37 law firms signed the WEPs; the second one was with the National Association of Banks (ABM), which was made during the 85 Banking Convention and where this association announced its commitment to the WEPs and their incorporation to the Global Alliance for Care; the third one was organized by the Global Compact where 18 signatory companies reaffirmed their commitment to gender equality. UN Women strengthened its collaboration with the Global Compact in WEPs implementation and for their Target Gender Equality initiative. Gender equality is considered as a critical objective to investing decisions . UN Women collaborated with the working group formed by the Ministry of Finance, with support from International Finance Corporation (IFC), to develop an index to evaluate gender equality in investment projects and thus determine their impact. UN Women has provided valuable inputs for the index proposal, based on WEPs Gender Gap Analysis Tool and the Bonds to Bridge the Gender Gap: A Practitioner's Guide to Using Sustainable Debt for Gender Equality publication. A first draft of the index is almost ready, and the work will continue next year. (all the working sessions are closed and not recorded). UN Women Mexico and India were selected to design an outcome-based approach for the Second Chance Programme. The initiative is being developed in collaboration with Social Finance and the Second Chance Global Team. Two potential scenarios for an Outcomes Based Approach (OBA) have been identified and we are currently discussing aspects such as target population, key outcomes, and potential partners
