STRATEGIC NOTE OUTCOME PROGRESS NOTE

SHOWING DATA OF : 2022

“By 2024, Malian people, particularly the most vulnerable, participate in the economy and benefit from the benefits of strong, inclusive and resilient growth that creates decent jobs Related.

The year 2022 has been marked by the aftermath of covid with still ongoing negative impact on the private sector and especially Women evolving in the formal and informal sector of the economy. The ongoing socio-political crisis that the country is facing has had an impact of women and their businesses. To advance on reaching sustainable results, the program has used strategical partnership such as partnerships with API and World Bank in the operationalization of the Women Business Center, FAFE in the capacity building of women entrepreneurs and structures like Impact Her in advancing women’s access to digital solutions and in building their capacities. The program has also applied the “leaving no one behind” concept throughout its interventions and more specifically by allowing more than 265 women evaluating in the informal sector to formalize their activities, hence allowing the capitalization of their contribution to the economy. UN Women and its partners have enabled over 1853 women owned enterprises and cooperatives to access diverse opportunities allowing them to improve their structuration and organizational capacities, acquire more information and opportunities on accessing procurement opportunities both at national level and exporting markets and to better evolve in the formal economy. Through strategic partnership, UNW has enabled different institutions to mainstream gender in their business model such as MINUSMA which is now actively engaged in putting into practice the gender responsive procurement principles. It has also enabled national structures to have a better understanding and take into consideration the needs of women owned businesses into two current reforms.
