Planned Budget:  
\$1.70 M

Actual Budget and Shortfall:  
\$0.00

Shortfall: \$1.70 M

Expenses:

\$0.00

STRATEGIC NOTE OUTCOME PROGRESS NOTE

SHOWING DATA OF : 2022

**More women play a greater role in and are better saved by humanitarian response and recovery efforts**

Technically supported the Department of Disaster Management Affairs with the development of a gender-sensitive 2022/2023 Multihazard contingency plan. This is to ensure women, girls and people living with disabilities have equitable access to resources, goods and services from the preparedness, response and early recovery interventions. Key hazards for the season include floods, strong winds, disease outbreaks, dry spells and. Of over 40,000 households approximately 204,000 women are expected to be affected; at least 70% (28,000 households) are temporarily displaced and will need food assistance among other basic needs. Large areas across the disaster-prone districts are anticipated to be flooded causing damage to crops, infrastructure (roads, public buildings, and private dwellings), and temporary disruption to access to basic services (health, security and education) which would increase vulnerabilities of women, girls and people living with disabilities if not considered
