## STRATEGIC NOTE OUTCOME PROGRESS NOTE

SHOWING DATA OF : 2022

### **Women agricultural producers have better access to productive resources adapted to the arid climate and to markets to improve their income in a sustainable way**

Under this impact, the office has achieved results. but given the geography and the various natural and security challenges, many challenges remain: More than 24,432 women, including 14,857 in 2022, have gained access to productive resources through the support of UN Women. a strategy for women's economic empowerment is available and is being monitored with all actors. According to the final evaluation of the WEE/Migration Zinder project conducted in 2022, which supported 1,500 women and youth (1,000 women and 500 youth in terms of economic resilience), the analysis shows that the improved seeds made available to the beneficiaries made it possible to meet their essential needs in terms of agricultural inputs and materials, technical and logistical capacity building, development of market gardening sites, means of transport, real estate infrastructure, and training in cultivation, processing and commercial techniques. According to the testimonies received from the evaluations, 80% of the beneficiaries claim to have an activity, a small business, with the arrival of the UN Women intervention, which has enabled them to stop migrating. They have benefited from training, and have learned to do certain activities that they did not know how to do before (preservation of agricultural products, infant flour, sesame oil, moringa oil). They got gardening equipment, fertilizer and improved seeds, which considerably increased their production
