STRATEGIC NOTE OUTCOME PROGRESS NOTE

SHOWING DATA OF : 2022

More women access equitable employment opportunities and services, increasing the rate of women’s participation in the workforce in Arab States, including the most marginalized.

The goal of increasing the women's labor force participation rate in the Arab States from around 20%, where its been stagnant for two decades, has been a priority for the UN Women Regional Office for Arab States. The legislative changes supported in Egypt, Jordan and Palesine through the JP, along with the regional committment by the League of Arab States paired with the region-wide work on the WEPs contribute to achieving that. With the goal of reducing the gender gap in unpaid care and domestic work and contribute to transform social norms that impede women’s access to paid employment , UN Women achieved some important milestones through critical reforms of relevant normative frameworks . At the beginning of 2022, three labor laws were reformed to approve or enhance paternity (fathers') leave in Egypt, Palestine, and Morocco thanks to advocacy work undertaken by UN Women in cooperation with other partners. These milestones were achieved as a result of policy dialogues and advocacy campaigning organized by UN Women during previous years at both regional and country level. In Egypt, one day of paternity leave was approved through its labor law reform; three days for civil servants in Palestine; and 15 days for civil servants in Morocco (an increase from the existing three days paternity leave approved some years ago). Although these legal reforms cannot be considered as best practice -as the global best practice for parental leave entails a fully paid leave, of equal duration for both parents and non-transferable-, they constitute a positive gradual step to achieve more equal and meaningful paternity leave , increase the engagement of men in childcare and reduce the burden of unpaid care on women in the longer term .
