## STRATEGIC NOTE OUTCOME PROGRESS NOTE

SHOWING DATA OF : **2022**

### Productivity of women in the agricultural value-chain increased

Three ASAL counties of Kitui, Laikipia , and West Pokot has made some progress in increasing the productivity of women in select agricultural value chains in 2022. 2,391 beneficiaries (Female: 2,002, Male: 389) adopted 15 CSA technologies and 15 CSA practices on 1,598 hectares of farmland. Additionally, 969 women established agribusinesses in select agricultural value chains in crop and livestock production and apiculture. As such, 419 women from 23 farmer groups aggregated and sold their produce making USD 17,640. Beneficiaries reported improved income, nutrition, and food security at the household level. This was partly attributed to the adoption of appropriate gender-transformative CSA technologies vertical and sunken kitchen gardens and improved locally made multi-use brooders for indigenous chicken production. A 30% increase in agricultural productivity is projected by the end of the project in 2023, due to the adoption of CSA technologies and practices by the beneficiaries. UN Women, in partnership with Food and Agriculture Organization (FAO), Village enterprise, GROOTS Kenya, Hand-in-Hand Eastern Africa, and Anglican Development Services Eastern (ADSE) contributed to strengthening the existing aggregation and supply chain mechanisms, particularly through linking beneficiary groups to input suppliers (seeds, chicks, pesticides, finance, and machinery), aggregators and buyers of their agricultural products. UN Women also focused on building the capacity of women in gender-responsive agriculture value chains (crops and livestock) as well as in financial literacy to help achieve increased access to markets and information. Additionally, UN Women strengthened the capacity of the target women to produce within the changing climate by training them on leadership, advocacy, and gender dynamics. As a result, the women successfully advocated and influenced the inclusion of gender-responsive CSA into county-integrated development plans (CIDPs III). For instance, Laikipia County increased budget allocation for gender and social protection by 4%. The other two counties have also integrated women, youth and PWD focused interventions in their CIDPs. Lessons Learned: There is a need to take a holistic and value-chain approach to increase the productivity of women and youth in agriculture. In addition to strengthening the capacity of women and youth

as agricultural producers, efforts should also be made to increase their participation in other agricultural value-chain nodes e.g., value-addition and agro-processing, etc. More efforts should be put into interventions that promote women's access to credit and markets and linkage made to existing government affirmative procurement and fund programmes e.g., Access to Government Procurement Opportunities (AGPO), National Government Affirmative Action Fund (NGAAF) etc.
