STRATEGIC NOTE OUTCOME PROGRESS NOTE

SHOWING DATA OF : 2022

Communities and other stakeholders are better able to prevent and respond to violence against women and girls and deliver essential services to victims

UN Women made strong progress in 2022 in the prevention and response to violence against women and girls by supporting communities and relevant stakeholder to efficiently deliver essential services to victims. As such, with UN Women support, more than 850,000 individuals from the community and mining sector improved their knowledge and awareness of GBV prevention and response including legal literacy, available GBV services, reporting mechanisms, prevention of harmful practices and promotion of positive masculinities as well as special protection to women and girls with disabilities. This was achieved using different mutually reinforcing mechanisms and approaches that included mobile clinics to increase the proximity of GBV services to the community, community outreach campaigns including the 16 days of activism, mass sports, Radio and TV Programmes as well as the use of social media platforms such as Facebook, Youtube and Twitter. In addition, UN Women in collaboration with Rwanda Bar Association convened "a consultative policy dialogue on GBV Prevention and Response in Rwanda: From Policy to Practice" which offered an opportunity to share experiences, good practices but also challenges and recommendations for decision making in relation to GBV prevention and response. The dialogue brought together different key stakeholders working in the area of gender equality, and prevention and response to GBV namely Government institutions such as the Ministry of Gender and Family Promotion, Ministry of Justice, Ministry of Education, National Public Prosecution Authority, Rwanda Investigation Bureau, Rwanda Biomedical Centre, Gender Monitoring Office, Rwanda Correctional Service, Rwanda National Police, UN Agencies, the Rwanda Bar Association and its members, CSOs and media practitioners among others. Consequently, the policy dialogue resulted in 21 recommendations that would ensure effective GBV prevention and response in Rwanda, and UN Women has committed to supporting their implementation and follow-up. In addition, 2818 GBV service providers have enhanced their capacity through UN Women's support in collaboration with Rwanda Investigation Bureau and different NGOs/CSOs namely Rwanda Women's Network, and Réseau des femmes which helped GBV victims to get effective support with dignity (victim-centered and human rights-based support). These service providers are composed of local community structures and local government leaders, youth volunteers, and local security organs. Moreover, thanks to the operationalization of 4 GBV shelters and Isange One stop centres safe rooms through UN Women support in collaboration with the Ministry

of Gender and Family Promotion, 448 GBV victims (416 Females and 32 Males) benefited from the provision of safe accommodation, protection and comprehensive support including medical-legal and psychosocial support which helped them to restore their hope of life and esteem. Furthermore, community-based monitoring and reporting tools were developed by UN Women in collaboration with Rwanda NGOs Forum on HIV/AIDS and Health Promotion to strengthen the capacity of institutions to respond effectively to GBV and HIV/AIDS-related issues with respect to leaving no one behind principle. In terms of building on the use of tools targeting female sex workers and adolescent girls and young women victims of GBV, 90 peer educators that include 50 Female Sex Workers and 40 Adolescent Girls and Young Women were skilled in screening, referrals, and monitoring the quality of services rendered to girls and women at the community level and by health center facilities.
