Country-Level Data for Tanzania country Outcome XM-DAC-41146-TZA_D_1.7

OUTCOME TZA_D_1.7   XM-DAC-41146-TZA_D_1.7

WCII: Gender statistics, sex-disaggregated data, and knowledge are produced, analyzed and used to inform policy making, advocacy and accountability for delivering gender equality and women's empowerment results

OUTCOME DETAILS

SDG alignment

Impact areas

Governance and participation in public life

Organizational outputs

Norms, laws, policies and institutions

Gender statistics

Policy Marker

GENDER EQUALITY

Humanitarian Scope

Outcome Description

POLICY ENVIRONMENT, DATA PRODUCTION AND USE: With key partnership with the National Bureau of Statistics (NBS) and Office of Chief Government Statistician (OCGS) Zanzibar, TCO will contribute to making sure that policy environment are congenial to produce gender statistics, quality production of gender statistics and those are accessible to all users (including governments, civil society, academia and the private sector) and can be analyzed to inform research, advocacy, policies and programmes, and promote accountability

UN Partners

WCII: Gender statistics, sex-disaggregated data, and knowledge are produced, analyzed and used to inform policy making, advocacy and accountability for delivering gender equality and women's empowerment results

There was improved policy and enabling environment and financial situation in Tanzania to produce gender data and statistics due to the accrued effect but there was also additional and continuous support since the inception of WC program. The current infrastructures of gender statistics are well established and functional as a result of constituting the statistics units system in NBS/OCGS, gender statistics strategies, establishing coordination mechanism, availability of gender statistics SDG indicators and increased capacity of producers on gender statistics. To reduce the financial gap, UN Women Tanzania was able to mobilise additional resources for gender statistics production from the European Union. There were new data sets on VAW and Population census which were supported by UN Women to produce and these new information would further help to reduce the data gap in various areas of gender data Volunteer National Review, five year development plan and others. Now more data and information are available to use for the program and policy making to address the issue of women and girls in Tanzania.
