OUTCOME VUT_D_2.4 [XM-DAC-41146-VUT_D_2.4](#)

Markets physical infrastructure and operating systems are improved to make them more sustainable, resilient to disaster risks and climate change, safer and more accessible.

OUTCOME DETAILS

SDG alignment

Impact areas

Women's economic empowerment

Organizational outputs

Access to services, goods and resources

Policy Marker

GENDER EQUALITY

Humanitarian Scope

No

UN System Function

Outcome Description

This outcome is about increasing women's voice in developing appropriate infrastructure that is safe and accessible - so this has elements of public safety, plus disaster preparedness and response as well as women's voice and participation. Work under this outcome brings together women leaders of market vendor associations with government planners to ensure that women's voices are included in the planning of infrastructure development

STRATEGIC NOTE OUTCOME PROGRESS NOTE

SHOWING DATA OF : 2022

Markets physical infrastructure and operating systems are improved to make them more sustainable, resilient to disaster risks and climate change, safer and more accessible.

Operations by market management in the six Vanuatu markets continue to improve, ensuring that markets are kept open, adhering to COVID-19 safety regulations and remain clean, hygienic and safe for selling produce and cooked food. The Markets for Change team conducted market infrastructure surveys and audits to confirm that markets are now more gender-responsive, accessible, and disaster resistant. New work undertaken in 2022 include the newly renovated market house extension at Luganville Market that is providing more space for selling and safety from the elements for market vendors, the majority of whom are women. In addition, the new installation of CCTV cameras and public address (PA) systems at Luganville, Port Vila and Marobe markets is contributing to vendor and customer safety by reducing the risk of theft and violence in markets. UN Women provided financial and technical support towards the strengthening of markets operating systems in Vanuatu.
