OUTCOME XM-DAC-41146-SLB_D_2.1

By 2027, more people, particularly those at risk of being left behind, benefit from more equitable access to resilient, and gender-responsive, quality basic services, food security/nutrition and social protection systems. [PCF Strategic Priority 2: People]

More Women Market vendors across four Markets in Solomon Islands have benefitted from basic quality services that is gender responsive. The Markets provided women market vendors and thier families an access to improved food security, nutrition and social protection systems within the Market place environment. The improvements and benefits to services were achieved through improved capacity, increased resources and implementation of key policies and strategies by the Provincial Governments or Local Governments in Solomon islands.
