OUTCOME BIH\_D\_1.1 [XM-DAC-41146-BIH\\_D\\_1.1](#)

**By 2025, people contribute to, and benefit from more accountable and transparent governance systems that deliver quality public services, and ensure rule of law**

### OUTCOME DETAILS

#### SDG alignment

#### Impact areas

#### Organizational outputs

#### Policy Marker

GENDER EQUALITY

#### Humanitarian Scope

No

#### UN System Function

#### Outcome Description

The strategic approach taken promotes the participation of women in governance structures and ensures a keen gender perspective in policy making and in processes related to EU integration, budgeting and resource allocation. Also, in embedding SDG commitments in budgets and enabling targeted planning and monitoring for SDG financing. UN Women will continue to address structural obstacles to women’s participation and promote gender sensitive actions and cooperation among the key actors with ability to address them, support close partnership between the gender institutional mechanisms and Directorate of European Integration and other institutions leading EU integration efforts at entity level to ensure the inclusion of a gender perspective and gender sensitive targeting in strategic priorities and allocation of IPA resources, and partner with Ministries of Finance and line ministries for integration of Gender Responsive Budgeting as a tool at all levels of planning and policy-making .

## STRATEGIC NOTE OUTCOME PROGRESS NOTE

SHOWING DATA OF: **2023**

### **By 2025, people contribute to, and benefit from more accountable and transparent governance systems that deliver quality public services, and ensure rule of law**

Throughout the year, important progress was made towards achieving this outcome. Government institutions made progress in implementing gender-responsive policy making, budgeting and integration of EU gender equality and women's empowerment commitments. This is evidenced by improved gender responsive budget circulars (at the level of BiH, Federation BiH, Canton Sarajevo); the establishment of gender responsive SDG Financing Framework as a comprehensive blueprint for integrated sustainable development; and increased demand for gender responsive accountability of institutions by supreme audit institutions. These results are a result of multiple interventions in the area of gender responsive programming and budgeting, implementation of national and international normative commitments, women's political participation and leadership, and the country's path to EU accession, while utilizing the coordination mandate and promoting accountability for the implementation of gender equality commitments. UN Women contributed to these changes through intensive advocacy and advisory work in the area of gender responsive governance in BiH. This included regional programs and exchanges, strategic guidance and gender analyses, local and regional trainings, and advocating with key ministries and institutions to effectively contribute to these changes. UNDP and the key government institutions in BiH, including gender institutional mechanisms, ministries of finance, supreme audit institutions and local governments partnered with UN Women to achieve these results. This outcome represents the third condition for substantive equity identified in the office's theory of change. The theory of change understands that, if relevant institutions have the necessary capacities which ensure gender-responsive analysis, planning, policy making, budgeting and integration of EU gender equality and women's empowerment commitments across sectors, then governance will be more accountable and transparent, especially in a gender-transformative way. The results achieved under this outcome (improved gender responsive budget circulars, the establishment of gender responsive SDG Financing Framework, and increased demand for gender-responsiveness by supreme audit institutions) contribute towards the necessary changes in relevant institutions outlined in the theory of change. We expect these changes to

contribute to more accountable and transparent governance, thus the theory of change is still relevant.
