OUTCOME BRA_D_1.1 [XM-DAC-41146-BRA_D_1.1](#)

Women, particularly those facing multiple forms of discrimination, increasingly participate in decision-making processes; and influence formulation, implementation and monitoring of national and subnational laws, policies, plans and budgets.

OUTCOME DETAILS

SDG alignment

Impact areas

Governance and participation in public life

Organizational outputs

Norms, laws, policies and institutions

Policy Marker

GENDER EQUALITY

Humanitarian Scope

No

Outcome Description

IF (i) national and subnational governments, the parliament, political parties and the electoral monitoring body have the capacity to formulate, implement and monitor laws, policies, plans and budgets responsive to the needs of women and girls; and IF (ii) women and gender equality advocates have the capacity to participate in decision-making processes, and to influence formulation, implementation and monitoring of national and subnational laws, policies, plans and budgets to promote women’s rights, leadership and political participation; THEN (iii) women, particularly those facing multiple forms of discrimination, will increasingly participate in decision-making processes, and influence formulation, implementation and monitoring of national and subnational laws, policies, plans and budgets BECAUSE (iv) legal and policy frameworks, institutions, systems, processes and capacities will be in place and inclusive to promote women’s rights, leadership and political participation.

STRATEGIC NOTE OUTCOME PROGRESS NOTE

SHOWING DATA OF : 2022

Women, particularly those facing multiple forms of discrimination, increasingly participate in decision-making processes; and influence formulation, implementation and monitoring of national and subnational laws, policies, plans and budgets.

In 2022, women still experienced significant barriers to participating in decision-making, and influencing laws, policies, plans and budgets. Some progress was made as the Parliament passed new special measures to improve women candidates' access to campaign funds, activists influenced policymaking at the state and municipal levels, and indigenous women's movements successfully positioned their rights in the national and international agendas. However, the lack of policy frameworks hindered the implementation of measures to prevent and respond to violence against women and girls (VAWP). Congress approved Constitution Amendment #177/2022, reaffirming a prior decision of the Electoral Court mandating that the distribution of public campaign funding by parties for women candidates should be proportional to the number of women and people of African Descent running for elections, observing the minimum of 30 per cent of the funds for each of these groups. Nevertheless, while women of African Descent were almost 18 per cent of the candidates in the 2022 elections, they received only 11 per cent of the resources of the public electoral fund. Women's participation was hindered by the lack of coordination and definition of institutional roles to enforce the legislation on VAWP adopted in 2021 and generate evidence (ONMP, 2022). To tackle the existing gaps, the Electoral Court and the Electoral Attorney General's Office established a joint response protocol, as a result of their enhanced knowledge of VAWP. The observatory of women in politics chaired by the Chamber of Deputies (Observatório Nacional da Mulher na Política - ONMP) launched a pilot for monitoring data on VAWP, as a result of their increased access to knowledge on interventions to prevent VAWP made available by UN Women. These developments represent a contribution towards the participation of women in public life and are, partially, an outcome of UN Women's efforts with key stakeholders to advocate for women in politics, resorting to evidence-based advocacy, technical advice and campaigning. The CO also fostered an intersectional approach that relies on global norms and standards. The federal government and the Judiciary discussed joint actions to grapple with VAWP, in a working group created and facilitated by UN Women. As a result, VAWP is now positioned in the political agenda and some of the key government institutions are collaborating to introduce concrete prevention and response measures.

Local governments Women subject to multiple forms of discrimination increasingly influenced decision-making in the states of Maranhão and Pará, and for the first time, the state plans on policies for women in both federal units integrate measures to address the needs of indigenous and quilombola women – namely the III Plan of Policies for Women of Maranhão state and the of III Plan of Policies for Women of Pará – , as a result of enhanced capacities to formulate and implement gender, race and ethnicity-responsive policies. In Maranhão, the government also launched the second edition of the programme Mulheres Guardiãs, aimed at enhancing women’s mobilization and human rights awareness, which for the first time specifically targeted indigenous and quilombola women, as a result of the government’s enhanced capacity to respond to their needs. In Maranhão, in the municipality of Penápolis, the mayor appointed a coordinator for policies for women for the first time, In the Grajaú municipality, also in state of Maranhão, the women’s council includes an indigenous representative, who for the first time was appointed by the civil society . The changes demonstrate that decision-makers now plan policies based on sustained dialogue with CSOs and evidence on gender and race inequalities. UN Women’s partnership with the government of Maranhão and Pará and municipalities through capacity building and integrated policy advice enabled this change to happen. The women’s machinery in the states of Maranhão and Pará played a pivotal role in mobilizing other government bodies, and the collaboration will continue in 2023, supported by the Government of Norway. In the municipality of Itabira (state of Minas Gerais), authorities increasingly used evidence and an intersectional approach to policy-making. For the first time, the municipal administration provided quilombola women with training on the use of agroecological logbooks. The municipality also revised essential services protocols to avoid the revictimization of women and girls subject to violence. These results come after years of collaboration between the municipality and UN Women through the project Itabira: Cidade 50-50. Indigenous women As a result of enhanced capacities for advocacy and social mobilization, indigenous women successfully positioned their rights in the national and international agenda and elected two members of the Articulação Nacional das Mulheres Indígenas Guerreiras da Ancestralidade (ANMIGA, a national articulation of indigenous women) for the Lower House: Ms Celia Xakriabá and Ms Sonia Guajajara – later appointed by elected President Lula to be the first Minister of Indigenous People. Also in 2022, ANMIGA developed its first national strategy of articulation and mobilization in the territories, which reached 15 states and 189 indigenous peoples and provided technical advice to 13 candidates. This comes after eight years of UN Women’s partnership with Indigenous women and technical support for movement building, including for the national strategy.
